## COMMUNICATIONS AND PETITIONS

Letter from the Secretary of State relating to suits pending in the U.S. District Courts re: reapportionment.

January 2, 1967

Honorable James R. Felt  
Speaker of the House of Representatives  
Capitol Building  
Helena, Montana

Dear Mr. Speaker:

Enclosed find three copies each of the following:

FINDINGS, CONCLUSIONS AND DECREE in Civil No. 539, A. S. ROBERTS on behalf of himself and other electors of the state of Montana similarly situated, plaintiff v. TIM BABCOCK, as Governor of the state of Montana and FRANK MURRAY, as Secretary of State of the state of Montana, defendants, in the United States District Court for the District of Montana, Billings Division, filed August 6, 1965;

FINDINGS, CONCLUSIONS AND DECREE in No. 1214, PHOEBE R. HERWEG, in behalf of herself and all other citizens and electors of the state of Montana, plaintiffs v. THE THIRTY NINTH LEGISLATIVE ASSEMBLY OF THE STATE OF MONTANA, TIM M. BABCOCK as Governor of the state of Montana, and FRANK MURRAY as Secretary of State of the state of Montana, defendants, in the United States District Court of the District of Montana, Helena Division, filed August 6, 1965.

Please note that each of these copies has been certified as a true copy of the one on file in the official records of this office.

Since it was necessary for me to carry out the Order of the Court in these instances, and since the instructions therein differ from the pertinent provisions of the law as they now appear, and as they appeared during the election of 1966, in the Revised Codes of Montana 1947, I suggest that the three enclosures be incorporated in your proceedings in such a way that they can be printed in full in some appropriate form in the 1967 Session Law.

I make this suggestion so that there will be a complete and permanent record of the continuity of the apportionment for Congressional representation and of the membership of the Legislature in its own publication, that would thereby be available for researchers throughout the State since the Session Laws are distributed as designated by law by the state of Montana to certain county offices in each county.

Sincerely yours,

FRANK MURRAY  
Secretary of State

Referred to Committee on Judiciary.

## REPORTS OF STANDING COMMITTEES

Mr. Speaker: We, your Committee on Bills, beg leave to report the following bills correctly engrossed: House Bill No. 1

WOODARD, Chairman

## FIRST READING AND COMMITMENT OF BILLS

The following bills were introduced, read first time, and referred to committees:

House Bill No. 3, introduced by Haines, Steele, Nugent, Northey, Ainsworth, Worden, Marbut: A bill for an act entitled: "An act authorizing the governing body of an incorporated city or town to adopt technical codes by reference; amending Section 11-1102, R.C.M. 1947." Referred to Committee on Affairs of Cities.

House Bill No. 4, introduced by Lucas, Stratton, Wayrynen, Fischer, Lundgren: A bill for an act entitled: "An act to repeal Sections 71-1501 through Section 71-1510, R.C.M., 1947, as amended; and to provide for medical assistance in conformity with Title XIX of the Federal Social Security Act of 1935 as amended; providing for the administration of the act by the state department of public welfare and the county departments of public welfare; providing eligibility requirements for assistance under the act; providing for counties' share of participation under the act and to amend Section 71-211, to conform herewith." Referred to Public Health, Welfare and Safety. Speaker announced that a fiscal note be attached to the bill.

It was moved by Lucas that the House recess, subject to Call of the Chair. Motion carried.

House resumed. Mr. Speaker in the Chair.

A committee of three consisting of Senators James, Lehrkind and Cotton, appeared and informed the House that the Senate was ready to join in joint session with the House to hear the Governor's message.

Assembly being in joint session, Lt. Governor James, occupying the Chair for the joint session, appointed the following committee to notify the Governor that the Senate and House of Representatives had convened in joint assembly and were ready to hear his message: Senators Manning and Mackay and Representatives McNamara, Casey and Boughton.

His Excellency, Tim Babcock, then appeared and was escorted to the rostrum. After being presented to the assembly by the President of the Senate, he delivered his address:

Mr. President, Mr. Speaker and Members of the 40th Legislative Assembly:

Approximately 77 years ago, Montana's first Governor, Joseph K. Toole, delivered a courageous message to a Montana legislature so rife with dissension that it had difficulty organizing.

The year was 1889. Only a month before the Governor made his address, Montana had been granted statehood. There was no fanfare or special celebration of this important event because the times were serious ones . . . just as today's times are serious.

"Government will be felt, if at all, most in its benefits and least in its restraints," Governor Toole told our first legislature. He went on to make positive recommendations concerning water, irrigation, homesteads, labor, corporations, the prison and the state hospital.

He had one note of cheer.

"After the payment of all outstanding claims and indebtedness . . . I think the state will, on January 1st, ensuing, have a small amount, not exceeding five thousand dollars, in the treasury."

As this 40th Legislative Assembly convenes, the people of Montana can look back upon some remarkable changes since this state came into existence a short 77 years ago. Progress has made our problems at least the equal in complexity to those of earlier days and growth has made them more numerous. Governor Toole talked in terms of thousands of dollars. Today we talk in millions.

Like Governor Toole, who was proud to report to a budding Montana

that its treasury was solvent, we, too, can take pride in the knowledge that our state is sound financially, as it enters the next biennium.

Together with steady industrial advancement, high employment and growing payrolls, financial solvency has been a goal achieved. Special note is due such accomplishments because many of you and many other Montanans have worked hard to make them a reality.

We are fortunate to have a strong foundation from which to proceed as the people of Montana and this 40th Legislature face the major decisions which each of us knows must be made.

Oliver Wendell Holmes wrote:

"We must sail . . . sometimes with the wind . . . sometimes against it . . . but we must sail . . . and not drift . . . nor lie at anchor."

So that we will not "lie at anchor", I am setting forth today a good many recommendations of the needs of the State of Montana. In doing so, I place special emphasis on the word "courage".

That is what is required of all of us if our state is to take the giant strides necessary to its immediate advancement.

As your studies, your debates and your visits with department personnel will reveal to you . . . Montana stands prepared to take such strides if it is the will of our people and this legislature that it do so.

In the popular tradition of the space age in which we live, I will call the program which is proposed today . . . "Operation Liftoff".

Our objective at launch is that of new and greater heights of accomplishment for Montana and its people.

\* \* \*

We are all aware that Montana must seek new sources of income. As the Budget Book will reveal, 21 million additional dollars will be needed in the next biennium, just to continue our programs already in existence.

But Montana cannot move forward or serve its people properly by limiting its services at present levels. If we are to compete with other states and offer our own citizens similar advantages, then we must provide for new programs which will allow Montana to meet the challenge of the future.

I have additional recommendations to make to you, both with regard to revenues and with regard to expenditures. In doing this, I ask that we take a progressive look at state government and the services it must offer.

Let me direct your attention to the fact that 90 percent of Montana's budget goes into three areas of responsibility . . . public education, public welfare and safety and the state's custodial institutions.

Of this total, more than 50 percent of our state general fund budget . . . the lion's share of our tax dollars . . . is dedicated to education. None of us would have it any other way.

Montana people have a proud record in the field of education. Our students compete and are successful among those of any other group in this nation.

Not only must we continue our efforts to educate our young people but we must redouble those efforts so that our youth never lacks for the preparation it must have to meet the challenges of a rapidly advancing world.

The best way to reduce the cost of public welfare is to make it possible for every person to obtain the kind of education which will permit him to be a productive and successful member of our society.

In the educational field, the state is responsible for elementary, secondary and higher education. In addition, the state must recognize a growing and obvious need to improve and expand vocational education programs.

The challenge facing our state and its people today is that they accept, wholeheartedly, their responsibility to educate Montana's youth.

It is one thing to talk in glowing terms about the future . . . but for our young people . . . the future is here! Their needs . . . and our responsibility . . . is now!

With the compelling speed of changing technology and advancing society, we will fail our young people if we do not provide answers to the problems of the future today.

For the support of elementary and secondary education in our state, I recommend that we increase budget authority for the school foundation program. I also recommend that the state support a greater portion of this budget. These schedules are based on the present cost of operating our public schools.

I also urge that our state assure a finance level of 85% of these increased schedules rather than the existing level of 75%.

In this manner, every school district will be assured of satisfying its budget need . . . and at the same time property tax levies for school purposes will be reduced substantially.

In the field of vocational education, Montana has an excellent basis to provide increasing educational opportunity to its young people who do not intend to seek a degree in higher education.

The State Board of Education, as well as other interested groups, has made recommendations for this program.

The great number of youths who do not or cannot seek a college degree make obvious the need for the state to enter, full scale, into the fields of vocational and vocational-technical education.

I recommend to you that the state of Montana make available \$1-½ million for the next biennium which, combined with federal funds and local support, will make possible at least three vocational schools.

These would be important additions to the excellent teacher training and other programs already underway in the vocational education field at Northern Montana College at Havre.

In making these recommendations, I ask that these schools be associated with existing high schools in Montana and that area designation remain with the State Board of Education.

There is no pressing need to create a separate board of vocational education. This responsibility properly lies with the State Board of Education.

The need for revenue increases in education cannot be more graphically illustrated than through enrollment figures at Montana's six university units.

In 1960, these six institutions enrolled nearly 10,500 students. This fall enrollments reached nearly 18,000. By 1975 there will be approximately 28,000 students on the campuses of our colleges and universities.

The budget recommendations for the university system reflect this growth. These recommendations also reflect an earnest desire to maintain quality in Montana education and to improve it where necessary.

Even though the total dollar amounts seem large, the requests, unfortunately, include little in the way of new or expanded programs. In our

University System, nearly \$8 out of each \$10 goes directly to salaries of teaching staff.

This is where most of our education dollars must be spent because quality education depends upon quality teaching.

It is here that students and taxpayers either gain or lose. The University budget recommendations which you are being asked to study indicate clearly that Montana is stressing **quality**.

In the field of education, consideration also should be given to the manner of computing payments to our Teachers' Retirement System. I recommend to you that our law be changed to permit payments and benefits to be computed on the full amount of teachers' salaries rather than the existing arbitrary limit of \$7,000 per year.

In 1963 our state legislature created a Division of Architecture and Engineering within the Department of Administration.

This department was given the responsibility for originating a sound building program for Montana which could be recommended to the legislature by the Governor.

This program has functioned well and I am, today, recommending a state building program for the next biennium.

Through their approval of Referendum 64, the people of the state have directed us to proceed immediately with plans for a long range building program.

I applaud their willingness to cure the building deficiencies at our state institutions and to accommodate ever increasing enrollments on our university campuses.

They have given Montana government building authority it has long needed.

The total building proposal is \$26.9 million for buildings on our university campuses, at our state institutions and in other areas of the state. Of this amount, \$5.6 million is anticipated in earmarked revenue and from self-liquidating sources. Also anticipated is a total of \$5.2 million in federal funds. A total of \$16.1 million should be authorized in state bond sales based on tobacco tax revenues.

I call your special attention to the Soldier's Home at Columbia Falls. In the state homes which are provided for aged and veterans, we should be able to offer an atmosphere that will provide residents, in their declining years, as much peace and contentment as can possibly be made available.

To this end, I again recommend most earnestly an appropriation adequate to construct a new Soldier's Home. Either we should do this . . . or we should close the outdated and dangerous facility which exists at present.

I am certain that all of you are aware of my keen desire to proceed with an effective building program for our state. It is an issue which has been clearly stated in each of my messages to the legislature. The program has had its share of past difficulties but these are behind us and solid advancement lies ahead.

The state building plan is ambitious but sound. Considering the need, the financing now available and the tight money slow down in private construction, there is no better time for an ambitious program. I ask you to authorize the construction of projects included in the building proposal.

We are fortunate to have an adequate supply of water along our major streams, although we sometimes experience local shortages on some tributaries. We must take immediate steps to establish our prior right to these waters for our present and future needs.

Nothing is more vital to a modern economy than water. No source will play a more important role in Montana's future.

Foreseeable needs indicate that, for industry alone, our state will require a 70 percent increase in the amount of water presently being used. To this must be added future water needs for agriculture, the backbone of Montana's economy.

Claims from other areas on the waters of the state, if established, could restrict severely our use of our water and thereby limit the state's general development.

I urge a \$2-½ million appropriation to construct facilities to satisfy immediate needs and sufficient to allow for the completion of a long range program to put this resource to use.

A complete inventory of ground water is an urgent necessity. The 25-year plans presently underway for the beneficial application of Montana water should be vigorously pursued.

All of Montana's water development programs cannot be completed in one year . . . or five . . . nor should they be.

During the orderly construction of conservation and use facilities, this resource should not be subject to out of state pirateering.

The strongest kind of declaration of Montana policy must be that of "hands off" of any waters needed here for the long range growth of this state.

In keeping with the theory of a stronger state government, I urge that you give favorable consideration to proposals of agriculture, business and industry which would provide self help programs.

For instance, in the case of grains, it is evident that our future lies in the field of further development of production and use. I ask that you determine a method whereby the quality and quantity of our agricultural products can be improved through research and marketing activities. This could be accomplished by the creation of an adequately self financed grower group or through state financing.

Montana's highway program is on schedule and its interstate system should be constructed to four-lane standards by 1973 in accordance with the Federal Highway Act of 1966.

However, highway funds provided by the state for matching monies never have been in more vital demand than now because of stringent regulations recently enacted by the Congress.

In passing the Highway Beautification Act, Congress gave federal agencies authority to withhold as much as 20 percent in federal aid apportionments from states which failed to comply with the regulations set forth.

Another 10 percent penalty was added for states which fail to comply with the Federal Highway Safety Act.

Coupled with all of this is recent action taken by the President, who cut the federal aid program for highways \$8 million for the coming year in Montana.

While the highway program will be curtailed because of the Presidential decision, Montana cannot afford 30 per cent in penalties which will be exacted at the national level should no legislative provision be made for implementation of the federal beautification and highway safety programs. The state has been forced once more into a position where it is left no room for argument.

In connection with highway safety, I ask that you add 100 officers to

the Montana Highway Patrol. While substantial, this increase still would leave our patrol at minimum manpower standards.

At present, each Montana patrolman covers and serves more area per patrolman than in any other state.

In the interests of brevity and mindful of normal capacity for endurance, I urge the following:

That the State Advertising Department budget be increased from \$150,000 to \$250,000 so that Montana can enjoy the advantages of a stepped up travel promotion program. As you know, revenues for State Advertising come from highway gas tax returns and in no way affect Montana's General Fund. Vacation travel year around is one of Montana's brightest areas of economic activity.

That thorough study be given the Fish and Game Commission's proposal to increase license fees. There is no bigger bargain in this state than the very nominal fee one must pay to enjoy bountiful hunting and fishing privileges.

That a substantial appropriation be granted to finance a growing and vitally needed state parks system. By comparison with other vacation-conscious states, Montana is weak in the state parks area of activity.

That a sound air pollution law be enacted which will permit industry and business to operate and, at the same time, safeguard the health, comfort and well being of our citizenry. Instances of wanton disregard of the public interest have demonstrated the need for this kind of legislation but discussions in recent months have been based on as much emotion as fact.

There are certain to be several air pollution bills introduced in this session of the legislature. One deserving of every consideration is that being proposed by the Air Pollution Council, a bi-partisan group appointed by the Board of Health which worked long and diligently to draw an air pollution bill which would serve Montana's needs.

Before the legislature two years ago, I asked that partisanship give way to partnership. In Montana's interests, I urge this once more.

In none of your discussions is that attitude more essential than in your consideration of air pollution legislation.

As you have reason to be very much aware, I cannot agree to legislation which is punitive.

That provision be made to pay a state bonus to Montana veterans of the Viet Nam conflict.

That the voting age in Montana be lowered to include persons of 18 years. As a member of this body, I twice voted for bills which would have given voting privileges to many young Montanas. We get a clearer picture of the devoted performances to adult duties we have come to expect of 18 year olds during time of war. My experience with young people in this state leads me to the conclusion that they are well equipped for the privileges of voting . . . perhaps better so than some of their elders.

That thorough study be given Montana Arts Council proposals to provide for Montana's participation in a national program of bringing the arts to the people of the state.

That approval be given legislation designed to revise Montana's dated corporation and criminal procedure statutes. Committees of outstanding attorneys have worked long and hard during the past two years to make these revisions possible. Additionally, it is my hope that the Criminal Law Commission will be continued by this body so that the substantive criminal law can receive a badly needed revision.

That state employees be more realistically reimbursed for housing and meals in of state travel and that allowances be adjusted for in-state travel.

I am disturbed, as are many of you, at the disparity between state salaries, particularly as they compare with those paid in our school system, in private industry and at the federal level.

At our institutions, we are asking competent attendants to accept pre-World War II wages for the important tasks assigned them. As a result, the employee turnover is rapid and many who have served us well find employment elsewhere. Some stay out of loyalty to the institutions and dedication to their work because they find satisfaction in helping human beings. They deserve better compensation than they are receiving. I urge that you study their salary schedules and make substantial adjustments of them.

Salaries for elected officials, department heads and key employees at state, county and municipal levels, should be increased in keeping with present day financial demands. Particular attention should be given the compensation paid district and supreme court judges. Consideration also should be given a provision to create a state retirement system for our judges with benefits at a level which would permit a jurist to leave the bench and live in modest comfort.

It has been the ambition of this state to provide a sound economy which would make available more jobs and increased payrolls. Montana's high employment rate, one of the best in the nation, and its low rates of unemployment is testimony to the fact that the workingman in our state is sharing in our general prosperity.

This is the result of substantial and diversified industrial growth which we have the privilege to enjoy. State promotional activities have been a contributing factor in our industrial development and our State Planning Board has justified its existence in excellent fashion.

It is my recommendation that we separate the State Planning Board from the Water Conservation Board and create a five-man Industrial Planning Commission. The Commission should be provided with adequate funds to carry forth its industrial promotion missions on behalf of the state.

Like all four-season states, Montana expects periods of seasonal unemployment each year. Weekly benefits paid to Montana workers under the Unemployment Compensation Act are among the lowest in the nation. The maximum payment now represents only 32 per cent of the average weekly wage paid in Montana.

In recent years, we have had reason for grave concern that contributions to the fund have failed to equal benefit payments.

I would urge that you increase benefits to at least 40 per cent of the average weekly wage and tighten eligibility requirements so that we pay benefits only to the deserving. Increased funds should be provided through a revision of contribution sections so that along with additional revenues, equity is achieved.

I call your attention to the Committee on Problems of Aging in Montana, which is serving 67,000 residents of our state who are in this classification. The situation of many of these worthy citizens is deplorable. Unfortunately, social security does not reach many of them nor has it taken into account the inflationary tendencies of the last decade.

The Aging Committee has presented a modest request of \$12,500 each year for the next biennium and I ask that this be approved. This will be matched on a dollar for dollar basis and it is possible the federal government will provide additional large sums for projects within the states.

The committee may be compelled to close its operations on March 1,

1967, unless a supplemental appropriation of \$3,879 is made to carry the staff until July 1. It would be unfortunate if the committee's activities are allowed to lapse since there are a number of important projects in operation, including one at the State Training School at Boulder for 125 retarded residents.

Montana is losing millions of dollars in gross income each year because of our citizens moving to other states when they reach retirement age. I suggest that it would profit Montana to offer special inducements in the way of housing and even tax and pension benefits to citizens who have earned their competence within Montana and remain here to join in the state's activities.

Incidentally, I request that the Committee be renamed the Commission on Aging.

Two years ago, I vetoed a bill which would have created a legislative post audit of administrative agencies. I still believe such a proposal to be contrary to the constitutional division of power between the legislative and executive branches and that it would create another expensive department.

In view of this, I would propose that, first, the duties of the State Examiner, as set forth in the statutes, be amended so as to require the examination of all state agencies, rather than only those which handle cash receipts or disbursements. Second, I would propose the establishment of an auditing bureau within the State Examiner's office to perform standard audits of selected agencies.

The bureau would report its findings to the Governor, the Attorney General, the Legislative Council and to each legislative session. In this manner, I believe the state can obtain quality protection at a reasonable cost.

As is easily apparent, "Operation Liftoff" is an expensive program. It is one calling for intelligent thought and the courage to achieve. Obviously, it is one calling, as well, for new revenue sources.

I would point out to you that, throughout the United States today, there is growing concern about the role of the states in American government. Five years ago, proposals that the federal government share much needed revenues with the states received little or no attention. This is beginning to change with the realization that states are becoming only administrative agencies for federal authorities. The imbalance in our national tax structure is leaving states, like the cities, starving in the midst of plenty.

The day is not far removed, I believe, when the national government will be required, by any of several means, to share revenue returns with the states. This lies in the future, however, and we are concerned with today.

Nevertheless, I ask that you memorialize Congress urging it to speed action to provide a fair tax sharing plan between the federal government and the states. The strength of our nation lies in the strength of its states.

The financial troubles which plague Montana and every other state are the unquestioned result of a national tax structure which has commandeered almost every available revenue dollar.

The people of the State of Montana pay annually \$500 million in taxes. Of this amount, 65 per cent goes to the federal government; 20 per cent goes for the operations of political subdivisions of Montana and only 15 per cent remains.

When that 15 per cent is to be used to operate the State of Montana and to match the grants that are offered out of the other 65 per cent, the mathematics become somewhat impossible.

In 1962, the federal government collected about \$149,339,000 more in taxes from Montanans than its direct expenditure in the state. In 1963,

federal taxes paid by Montanans over direct federal expenditures were about \$121,000,000 and in 1964 they were \$22 million.

Much publicized statements that Montana receives more in federal funds each year than its people pay in federal taxes obviously are deceitful.

It is of interest that during the three years from 1962 through 1964, the federal government's increased tax revenues from Montana averaged \$12,313,000 annually. By comparison, the increase in state taxes during the same period was an average of \$1,349,000 annually.

We have been left, as you see, with little recourse except to meet our financial obligations by increasing taxes here and there on a hodge-podge basis. No longer will such a program of expediency meet today's demanding needs. No longer, either, can we continue to heap more and more taxes on property owners.

We have one last untapped source of major revenue to which we can turn. It is one which has been adopted by 43 of the 50 states and which will be adopted by still more.

That source is a sales tax.

Almost weekly, the federal government makes available certain services . . . but only if the states are willing to participate and provide matching funds with those coming from Washington, D.C.

All of the states around us . . . every state west of the Mississippi River, except Nebraska, Oregon and Montana . . . have available for these matching funds the revenues from a sales tax. For Montana to continue without this . . . the largest revenue producer of them all . . . puts us at serious disadvantage.

My position on a sales tax in Montana is that it should be referred to the people of the state. I in no way deviate from that stand. This would be a drastic change in our tax policy and a decision of so much importance properly belongs with the people.

My request of this assembly in this:

I ask that you pass a referendum measure calling for a 3 per cent sales tax and that this go to the people for their vote in a special election during the month of May.

If, by chance, the measure fails to achieve a majority, I will call you into special session to seek an alternate source of revenue for Montana or take what other action necessity demands.

A 3 per cent sales tax, using the formula adopted by South Dakota, will bring the state about \$77 million for the biennium after the cost of collection.

In addition to providing the dollars necessary to Montana's basic needs, this will bring about long overdue property tax relief and tax equity. It will allow the state to move forward in the following areas:

1. It will provide \$25.8 million for new foundation program schedules. It will allow the state to support 85 per cent of the foundation program, increasing substantially the equity of our financing of primary and secondary education.

2. Without impairing other programs, it will allow \$16.4 million of general fund support necessary to maintain the current position of the university system.

3. It will eliminate the necessity for renewing the 6 mill university levy, thus directly relieving \$10.1 million in property taxes.

4. It will permit an income tax credit of \$10 per dependent, providing income tax relief in the amount of \$9.8 million.

5. It will make available additional general fund support for our public institutions in the amount of \$5.6 million.

6. It will provide nearly \$3 million for the construction of new water projects and for the development of a comprehensive plan for the use of Montana's water.

7. It will make it possible for the state to provide \$2 million in aid to our cities.

8. It will make it possible for the state to begin a basic program of vocational education, with \$1,500,000 initially available for this purpose.

9. It will provide \$1,619,500 to expand medical services to needy persons under the provisions of Medicaid or Title 19 of the Social Security Act.

This, then, concludes my revenue approach to the problems of government in Montana. In a very short time, you will receive the State Budget Book . . . the contents of which reflect the long hours and detailed work which the Budget Director and his staff have put into it. Within this book are outlined the other essential needs of the state, and you are certain to become extremely familiar with it during the next 60 days.

At the beginning of this joint session, we paused to ask spiritual guidance in making decisions for the people of Montana.

Let us remember that this responsibility is too great for any of us as individuals . . . but that together, in a spirit of brotherhood and mutual understanding . . . we can make these decisions with the wisdom and courage which our people have entrusted to us.

I extend to all of you my personal best wishes.

(4) The director may delegate to any employee of the board such duties and functions as he deems necessary for the proper and efficient administration of this act, and the director shall have authority, with the approval of the board, to hire additional employees and to discharge same for cause.

Section 5. (1) There is hereby created an air pollution control advisory council. The advisory council shall consist of eleven (11) members as follows:

The executive officer of the state board of health; and ten (10) members to be appointed by the governor as follows: a representative of labor; a representative of agriculture; a representative of the manufacturing industry; a representative of the fuel industry; a practicing physician licensed in Montana; a practicing veterinarian licensed in Montana; a practicing registered professional chemical or environmental engineer; a meteorologist; a conservationist; and an urban planning consultant. The chairman shall be elected by the advisory council from among this number.

(2) Members are appointed by the governor with the advice and consent of the Senate. The terms of members shall be four (4) years except

The ten (10) members appointed by the governor to serve on the advisory council shall be paid in addition to actual travel expenses, twenty-five dollars (\$25) per day for each day of actual services in the performance of their duties, and all members of the advisory council shall be reimbursed for travel and other necessary expenses incurred in their official duties as members of the advisory council. All expenses of members who are otherwise in the employ of the state government shall be paid from the appropriation to their respective agencies. The expenses and per diem of the members who are appointed by the governor shall be paid from funds made available to the state board of health.

(4) The advisory council shall hold at least two (2) regular meetings each calendar year and shall keep a summary record of its proceedings which shall be open to the public for inspection. Special meetings may be called by the chairman and must be called by him upon receipt of a written request signed by two (2) or more members of the advisory council. Notice of the time and place for all meetings shall be given in advance to each members of the advisory council by the secretary. A majority of the members of the advisory council shall constitute a quorum.

(5) The secretary of the advisory council shall be a member of the staff of the state board of health, designated by the executive officer of the board. The secretary shall keep all records of meetings of, and actions taken by, the council. He shall keep the advisory council advised as to actions taken by persons in response to recommendations and orders issued under authority of this act and shall perform other duties as determined by the advisory council, not inconsistent with rules, regulations, and policies adopted by authority of this act or specific authority otherwise given the advisory council.

(6) The advisory council may consider standards, rules, and regulations as provided in Section 10 of this act and any other matter related to the purposes of the act, which may be submitted to it by the board. It may make recommendations to the board on its own initiative concerning the administration of this act.

Section 6. Powers of board. In addition to any other powers conferred on it by law the board may: (1) Adopt, amend, and repeal rules implementing and consistent with the provisions of this act.

(2) Hold hearings relating to any aspect of or matter in the administration of this act, at any place or places designated by the board. The board may designate the director as the hearing officer at any hearing set by the board and authorize him to make rulings on evidence and conduct of the hearing. The board or the director as hearing officer may compel the attendance of witnesses and the production of evidence at hearings. The board shall designate an attorney to assist in conducting hearings and shall appoint a reporter who shall be present at all hearings and take full stenographic notes of all proceedings thereat, transcripts of which will be available to the public at cost.

(3) Issue such orders as may be necessary to effectuate the purposes of this act and enforce them by all appropriate administrative and judicial proceedings.

(4) Require access to records relating to emissions.

(5) Secure necessary scientific, technical, administrative, and operational services, including laboratory facilities, by contract or otherwise.

(6) Prepare and develop a comprehensive plan or plans for the prevention, abatement, and control of air pollution in this state.

(7) Encourage voluntary cooperation by persons and affected groups to achieve the purposes of this act.

(8) Encourage local units of government to handle air pollution problems within their respective jurisdictions on a cooperative basis, and to provide technical and consultative assistance therefor. If local programs are financed with public funds, the board may contract with the local government to share the cost of the program. However, the state share may not exceed thirty percent (30%) of the total cost.

(9) Encourage and conduct studies, investigations, and research relating to air contamination and air pollution and their causes, effects, preventions, abatement, and control.

(10) Determine by means of field studies and sampling the degree of air contamination and air pollution in the state and the several parts thereof.

(11) Make a continuing study of the effects of the emission of air contaminants from motor vehicles on the quality of the outdoor atmosphere of this state and the several parts thereof, and make recommendations to appropriate public and private bodies with respect thereto.

(12) Establish ambient air quality standards for the state as a whole and for any part thereof.

(13) Collect and disseminate information and conduct educational and training programs relating to air contamination and air pollution.

(14) Advise, consult, contract, and cooperate with other agencies of the state, local governments, industries, other states, interstate and inter-local agencies, the United States, and any interested persons or groups.

(15) Consult, upon request, with any person proposing to construct, install, or otherwise acquire an air contaminant source or device or system for the control thereof, concerning the efficiency of such device or system, or the air pollution problems which may be related to the source, device, or system. Nothing in any such consultation shall be construed to relieve any person from compliance with this act, rules in force pursuant thereto, and any other provision of law.

(16) Accept, receive, and administer grants or other funds or gifts from public or private agencies, including the United States, for the purpose of carrying out any of the functions of this act. Funds received by the board pursuant to this section shall be deposited in the state treasury to the account of the board.

Section 7. Classification and reporting. (1) The board may classify air contaminant sources which in its judgment may cause or contribute to air pollution according to levels and types of emissions and other characteristics which relate to air pollution, any may require reporting for any such class or classes. Such classifications shall be made with special reference to effects on health, economic and social factors, and physical effects on property, and may be applied to the state as a whole or to any designated area.

(2) Any person operating or responsible for the operation of air contaminant sources of any class for which the rules of the board may require reporting shall make reports containing such information as may be required concerning location, size and height of contaminant outlets, processes employed, fuels used, and the nature and time periods or duration of emissions, and any other matter relevant to air pollution which is available or reasonably capable of being assembled.

Section 8. Permits. (1) The board may by rule or regulations, prohibit the installation, alteration, or use of any machine, equipment, device

or other article which it finds may cause or contribute to air pollution or which is intended primarily to prevent or control the emission of air pollutants, unless a permit therefor has been obtained from it.

(2) The board may require that applications for such permits shall be accompanied by plans, specifications, and such other information as it deems necessary.

(3) The board shall provide for the issuance, suspension, revocation, and renewal of any permits which it may require pursuant to this section.

(4) If a permit is required, the board must decide within ninety (90) days after receiving application therefor, whether or not the permit will issue. If no decision is rendered within that time, permission shall be deemed to have been granted.

Section 9. Inspections. (1) Any duly authorized officer, employee, or representative of the board may enter and inspect, at any reasonable time, any property, premises, or place, except a private residence, on or at which an air contaminant source is located or is being constructed or installed for the purpose of ascertaining the state of compliance with this act and rules in force pursuant thereto.

(2) No person shall refuse entry or access to any authorized representative of the board who requests entry for purposes of inspection, and who presents appropriate credentials. No person shall obstruct, hamper, or interfere with any such inspection.

(3) At his request, the owner or operator of the premises shall receive a report setting forth all facts found which relate to compliance status.

Section 10. Emissions prohibited. (1) The board may establish the limitations of the levels, concentrations, or quantities of emissions of various pollutants from any source necessary to prevent, abate or control air pollution. Except as otherwise provided in or pursuant to this section, such levels, concentrations, or quantities shall be controlling throughout the state and no emission in excess thereof shall be lawful.

(2) In any area where the concentration of air pollution sources, or of population, or where the nature of the economy of, or land and its uses so require, the board may fix more stringent requirements governing the emission of air pollutants than those in effect pursuant to subsection (1) of this section.

(3) The board may by rule use any widely recognized measuring system for measuring emission of air contaminants.

(4) Should federal minimum standards of air pollution be set by federal law, the board may, if necessary in some localities of this state, set more stringent standards by rule or regulation.

Section 11. Enforcement. (1) Whenever the board has reason to believe that a violation of any provision of this act or rule made pursuant thereto has occurred, it may cause written notice to be served upon the alleged violator or violators. The notice shall specify the provision of this act or rule alleged to be violated, and the facts alleged to constitute a violation thereof, and may include an order to take necessary corrective action within a reasonable period of time stated in the order. Any such order shall become final unless, no later than thirty (30) days after the date the notice is received, the person or persons named therein request in writing a hearing before the board. Upon receipt of such request, the board shall hold a hearing.

(2) If, after a hearing held pursuant to subsection (1) of this section, the board finds that a violation or violations have occurred, it shall either affirm or modify any order previously issued, or issue an appropriate order or orders for the prevention, abatement, or control of the emissions involved

or for the taking of such other corrective action as it may deem appropriate. If, after hearing on an order contained in a notice the board finds that no violation is occurring, it shall rescind the order. Any order issued as part of a notice or after hearing may prescribe the date or dates by which the violation or violations shall cease and may prescribe time limits for particular action in preventing, abating, or controlling the emissions.

(3) In lieu of issuing the order provided for in subsection (1) of this section, the board may either:

(a) Require that the alleged violator or violators appear before it for a hearing at a time and place specified in the notice, and answer the charges complained of; or

(b) Initiate action pursuant to Section 16 of this act.

(4) Nothing in this act shall prevent the board from making efforts to obtain voluntary compliance through warning, conference, or any other appropriate means.

(5) In connection with any hearing held pursuant to this section, the board may, and upon application by any party shall, compel the attendance of witnesses and the production of evidence on behalf of all parties.

Section 12. Emergency procedure. (1) Any other provisions of law to the contrary notwithstanding, if the director finds that a generalized condition of air pollution exists and that it creates an emergency requiring immediate action to protect human health or safety, the director shall order persons causing or contributing to the air pollution to reduce or discontinue immediately the emission of air contaminants. Upon issuance of any such order, the director shall fix a place and time, not later than twenty-four (24) hours thereafter, for a hearing to be held before the board. Not more than twenty-four (24) hours after the commencement of such hearing, and without adjournment thereof, the board shall affirm, modify, or set aside the order of the director.

(2) In the absence of any such generalized condition as that referred to in subsection (1) of this section, if the director finds that emissions from the operation of one or more air contaminant sources is causing imminent danger to human health or safety, he may order the person or persons responsible for the operation or operations in question to reduce or discontinue emissions immediately, without regard for the provision of Section 11 of this act. In such event, the requirements for hearing, and affirmation, modification, or setting aside of orders set forth in subsection (1) of this section shall apply.

(3) Nothing in this section shall be construed to limit any power which the governor or any other officer may have to declare an emergency and act on the basis of such declaration, whether such power is conferred by statute or constitutional provisions or inheres in the office.

Section 13. Variances. (1) Any person who owns or is in control of any plant, building, structure, process or equipment may apply to the board for an exemption or partial exemption from rules or regulations governing the quality, nature, duration or extent of emissions of air pollutants. The application shall be accompanied by such information and data as the board may require. The board may grant such exemption or partial exemption if it finds that:

(a) The emissions occurring or proposed to occur do not constitute a danger to public health or safety; and

(b) Compliance with the rules or regulations from which exemption is sought would produce hardship without equal or greater benefits to the public.

(2) No exemption or partial exemption shall be granted pursuant to this section except after public hearing on due notice and until the board

has considered the relative interests of the applicant, other owners or property likely to be affected by the emissions, and the general public.

(3) No exemption or partial exemption pursuant to this section shall be granted for a period to exceed one (1) year, but any such exemption or partial exemption may be renewed for like periods if no complaint is made to the board on account thereof or if, such complaint having been made and duly considered at a public hearing held by the board on due notice, the board finds that renewal is justified. No renewal shall be granted except on application therefor. Any such application shall be made at least sixty (60) days prior to the expiration of the exemption or partial exemption. Immediately prior to application for renewal the applicant shall give public notice of such application in accordance with rules and regulations of the board. Any renewal pursuant to this subsection shall be on the same grounds and subject to the same limitations and requirements as provided in subsection (a) of this section.

(4) An exemption, partial exemption or renewal thereof shall not be a right of the applicant or holder thereof but shall be in the discretion of the board. However, any person adversely affected by an exemption, partial exemption or renewal granted by the board may obtain judicial review thereof as provided by Section 14 of this act.

(5) Nothing in this section and no exemption, partial exemption or renewal granted pursuant hereto shall be construed to prevent or limit the application of the emergency provisions and procedures of Section 12 of this act to any person or his property.

Section 14. Hearings and judicial review. (1) No rule and no amendment or repeal thereof shall take effect except after public hearing on due notice, and after the advisory council has been afforded not less than thirty (30) days prior to publication of the proposed text to comment thereon. Such notice shall be given by public advertisement not less than twenty (20) or more than thirty (30) days prior to the date set for such hearing.

(2) Nothing in this section shall be construed to require a hearing prior to the issuance of an emergency order pursuant to Section 12 of this act.

(3) Any person aggrieved by any order of the board or local control authority may apply for rehearing upon one or more of the following grounds, and upon no other grounds:

(a) The board or local control authority acted without or in excess of its powers;

(b) The order was procured by fraud;

(c) The order is contrary to the evidence;

(d) The applicant has discovered new evidence, material to him, which he could not, with reasonable diligence, have discovered and produced at the hearing;

(e) Competent evidence was excluded to the prejudice of the applicant. The petition must be in such form and filed in such time as the board shall prescribe.

(4) (a) Within thirty (30) days after the application for rehearing is denied, or, if the application is granted, within thirty (30) days after the decision on the rehearing, any party aggrieved thereby may appeal to the district court of any judicial district of the state which is the situs of property affected by the order.

(b) The appeal shall be taken by serving a written notice of appeal upon the executive officer of the board, which service shall be made by the delivery of a copy of the notice to such officer, and by filing the original with the clerk of the court to which the appeal is taken. Immediately upon

service upon the board, the board shall certify to the district court the entire record and proceedings, including all testimony and evidence taken by the board. Immediately upon receiving the certified record, the district court shall fix a day for filing of briefs and hearing arguments on the cause, and shall cause a notice of the same to be served upon the board and the appellant.

(c) The court shall hear and decide the cause upon the record of the board. The court shall determine whether or not the board regularly pursued its authority, whether or not the findings of the board were supported by substantial competent evidence and whether or not the board made errors of law prejudicial to the appellant.

(5) Either the board or the person aggrieved may appeal from the decision of the district court to the supreme court. The proceedings before the supreme court shall be limited to a review of the record of the hearing before the board and of the district court's review of that record.

Section 15. Confidentiality of records. (1) Any records or other information concerning air contaminant sources which are furnished to or obtained by the board, and which, as certified by the owner or operator, relate to production or sales figures or to processes or production unique to the owner or operator or which would tend to affect adversely his competitive position, shall be only for the confidential use of the board in the administration of this act, unless the owner shall expressly agree to their publication or availability to the general public.

(2) Nothing contained in this section shall be construed to prevent the use of such records or information by the board in compiling or publishing analyses or summaries relating to the general condition of the outdoor atmosphere, provided that such analyses or summaries do not identify any owner or operator or reveal any information made otherwise confidential by the provisions of this section.

Section 16. Local air pollution control programs. (1) Any municipality or county may establish a local air pollution control program upon being petitioned by fifteen percent (15%) of the qualified electors within its jurisdiction, and may thereafter administer within its jurisdiction said air pollution control program which:

(a) Provides by ordinance or local law for requirements compatible with more stringent, or more extensive than those imposed by Sections 11, 13 and 14 of this act and rules issued thereunder;

(b) Provides for the enforcement of such requirements by appropriate administrative and judicial process;

(c) Provides for administrative organization, staff, financial and other resources necessary to effectively and efficiently carry out its program; and

(d) Providing such program is consistent with the intent and purposes of this act and is approved by the board after a public hearing conducted according to the provisions of Section 6 of this act.

(2) If the board finds that the location, character, or extent of particular concentrations of population, or air contaminant sources, or geographic, topographic, or meteorological considerations, or any combinations of any of the foregoing, are such as to make impracticable the maintenance of appropriate levels of air quality without an areawide air pollution control programs, the board may determine the boundaries within which such program is necessary and require it as the only acceptable alternative to direct state administration.

(3) (a) If the board has reason to believe that an air pollution control program in force pursuant to this section is inadequate to prevent and control air pollution in the jurisdiction to which such program relates, or that the program is being administered in a manner inconsistent with the

requirements of this act, the board shall, on due notice, conduct a hearing on the matter.

(b) If, after the hearing, the board determines that the program is inadequate to prevent and control air pollution in the jurisdiction to which it relates, or that it is not accomplishing the purposes of this act, it shall require that necessary corrective measures be taken within a reasonable time, not to exceed sixty (60) days.

(c) If the jurisdiction fails to take such measures within the time required, the board shall administer within such jurisdiction all of the provisions of this act. The board's control program shall supersede all municipal or county air pollution laws, regulations, ordinances, and requirements in the affected jurisdiction. The cost of such a program shall be a charge on the municipality or county.

(4) If the board finds that the control of a particular class of air contaminant source because of its complexity or magnitude is beyond the reasonable capability of the local jurisdiction or may be more efficiently and economically performed at the state level, it may assume and retain control over that class of air contaminant source. No charge shall be assessed against the jurisdiction therefor. Findings made pursuant to this subsection may be either on the basis of the nature of the sources involved or on the basis of their relationship to the size of the communities in which they are located.

(5) Any jurisdiction in which the board administers its air pollution control program pursuant to subsection (3) of this section may with the approval of the board establish or resume an air pollution control program which meets the requirements of subsection (1) of this section.

(6) Any municipality or county may administer all or part of its air pollution control program in cooperation with one or more municipalities or counties of this state or of other states.

(7) Nothing in this act shall be construed to supersede or oust the jurisdiction of any local air pollution control program in operation on the effective date of this act, provided that within two (2) years from such date any such program meets all requirements of this act for a local air pollution control program.

Section 17. State and federal aid. (1) Any local air pollution control program meeting the requirements of this act and rules made pursuant thereto shall be eligible for state aid in an amount equal to thirty percent (30%) of the locally funded annual operating cost thereof.

(2) Subdivisions of the state may make application for, receive, administer, and expend any federal aid for the control of air pollution or the development and administration of programs related to air pollution control, provided that any such application is first submitted to and approved by the board. The board shall approve any such application if it is consistent with this act and any other applicable requirements of law.

Section 18. Penalties. (1) Any person who violates any provision of this act, or any rule in force thereunder or any order made pursuant thereto, other than Section 15, shall be guilty of an offense and subject on account thereof to a fine not to exceed one thousand dollars (\$1,000). Each day of violation shall constitute a separate offense.

(2) Any person who wilfully violates Section 15 of this act shall be guilty of an offense and subject on account thereof to a fine not to exceed one thousand dollars (\$1,000).

(3) Action pursuant to subsections (1) or (2) of this section shall not be a bar to enforcement of this act, or of rules or orders made pursuant thereto, by injunction or other appropriate remedy. The board may institute and maintain in the name of the state any and all such enforcement proceedings.

(4) Nothing in this act shall be construed to abridge, limit, impair, create, enlarge, or otherwise affect substantively or procedurally the right of any person to damage or other relief on account of injury to persons or property and to maintain any action or other appropriate preceeding therefor.

(5) All fines collected shall be deposited to the state general fund.

Section 19. Limitations. Nothing in this act shall be construed to:

(1) Grant to the board any jurisdiction or authority with respect to air contamination existing solely within commercial and industrial plants, works, or shops.

(2) Affect the relations between employers and employees with respect to or arising out of any condition of air contamination or air pollution.

(3) Supersede or limit the applicability of any law or ordinance relating to sanitation, industrial health, or safety.

Section 20. Classification of property for taxation. (1) Facilities, machinery or equipment, attached or unattached to real property, utilized to reduce, eliminate, control or prevent air pollution, shall be classified as Class Seven (7) for the purpose of taxation under the provisions of Section 84-301.

(2) The decision, whether the facilities, machinery or equipment are utilized to reduce, eliminate, control or prevent air pollution, shall be made by the director and approved by the state board of equalization.

Section 21. Severability. It is the intent of the legislative assembly that if a part of this act is invalid, all valid parts that are severable from the invalid part remain in effect. If a part of this act is invalid in one or more of its applications, the part remains in effect in all valid applications that are severable from the invalid applications.

Section 22. Appropriation. Seventy-five thousand dollars (\$75,000) is appropriated from the general fund for the purpose of paying salaries, administrative expenses, and other cost necessary to carry out provisions of this act during the biennium beginning July 1, 1967.

Section 23. Sections 69-3901, 69-3902 and 69-3903, R.C.M. 1947, are hereby repealed.

And as amended, do pass.

## REPORTS OF SELECT COMMITTEES

REPORT OF SELECT COMMITTEE OF THE HOUSE OF REPRESENTATIVES IN THE 40TH LEGISLATIVE ASSEMBLY OF THE STATE OF MONTANA, APPOINTED FOR THE PURPOSE OF STUDYING THE SALARIES AND WAGES OF STATE, COUNTY AND CITY OFFICIALS.

MR. SPEAKER AND MEMBERS OF THE HOUSE OF REPRESENTATIVES:

The members of the select committee, appointed for the purpose of studying the salaries and wages of state, county and city officials do respectfully report as follows:

## STATE

The pay of state employees is set in each department by the department head. The rate of pay depends upon the budget of the various departments.

Those whose funds come from the general fund, in general, do not fare as well as those departments which receive federal grants, matching money or other fees and funds outside the general fund. As a result there is no uniformity in duties or rate of pay in the various departments of the state. Also employees of the general fund departments, as soon as they are trained, tend to move on to other departments at an increase in pay for the same work which creates a training problem and employee turnover problem in the various departments of the state.

There is also no uniformity in the policies of the different departments on sick leave, vacation, overtime and the like. Some are able to pay overtime, others grant days off for overtime worked. There is a difference in the amount of sick leave and vacation time that can be accumulated with each department making its own policy depending on its budget.

The budget submitted by the Governor recommends raises for state employees at the rate of twenty-five dollars (\$25) per month for the biennium or five percent (5%) of the gross salary, whichever is the lesser, providing the revenue to allow these increases is available. Although this is probably the only way now available to grant raises it does tend to compound the problems rather than solve them.

This condition must continue until some job or salary classification study is made. This could be done either by the office of the State Budget Director or by an outside firm skilled in such studies. It would be our opinion that the study should be made, and should be conducted by an outside firm whose capabilities would be best suitable to the needs of the state of Montana. But, in any event, such a study should be made since it is probably the only way to achieve any order and uniformity in the pay, job classification and benefits of state employees. Legislation to accomplish this purpose has been introduced.

It would also be our opinion that some adjustments should be made in the salaries of the state administrative and judicial offices. Some of our officers are the lowest paid of the states.

We believe that the salaries of the state administrative offices should not be arbitrarily limited by statute. Statutory limitations tend to prevent the realistic adjustment of those salaries that are now too low and makes difficult the future reappraisal of such salaries as changing times makes desirable.

We recommend that the statutory limitation on the salaries of the state administrative offices be eliminated and that such salaries in the future be fixed by legislative enactment. We recommend also that the salaries of these officers be raised in about the proportion that raises may be granted to the state elective officers. Legislation has been introduced to accomplish these objectives.

## COUNTY

The Constitution of Montana prohibits the state legislature from delegating to the counties the authority to set the salaries of county officers and officials. For this reason we make no such recommendation although we believe that this authority should reside in the counties.

Legislation concerning the salaries of county officers and officials has already been introduced and is now receiving consideration and we do not recommend additional legislation.

## CITY

The cities of our state have problems and capabilities so diverse that none can or should be treated uniformly.

Our municipal officers and administrators are for the most part dedicated and capable men, who have a far greater understanding of the prob-

lems that can exist at the level of the state legislature. In most instances, their pay is in no way commensurate with their capabilities or responsibilities, and we do not believe that the state legislature can adequately adjust these inequities on any basis that can apply uniformly to all cities.

Having confidence in the administrators of our cities, we recommend that the fixing of the compensation of town and city officers and employees be given to the cities with all salary restrictions on municipal officers at the state level being removed. Legislation to accomplish this has been introduced.

### CONCLUSION

We believe that the recommendations made by our committee begin to recognize the changed conditions in our governmental and political structures.

The transition of our nation from an agrarian to an industrial economy has brought about many changes in our social and economic institutions, but many phases of our political and governmental bodies are still geared to a social and economic system that no longer exists. Time was when our people entered politics only after they were financially secure and political office was the recognized way to cap a successful business career and render a public service. It was accepted that political office was a financial sacrifice to be engaged in largely by those of substantial wealth who could afford to serve for personal satisfaction and a gratification of a desire for service.

The salaries we pay to many of our government officers and officials is still based upon this philosophy. This means that the young, energetic men who have been educated to a career in government cannot afford to run for the high offices for which they are so highly qualified.

We believe that this condition will continue until salaries are established which will correct it. Legislation has been introduced recommending salaries which we believe are more in reality with our changing times.

### HOUSE RESOLUTION NO. 3

INTRODUCED BY Spahr, Newby, Nichols

A resolution of the House of Representatives of the state of Montana directing the State Board of Examiners and the state controller to examine the need for a state office building, determine the economic feasibility of it, and report their findings to the Forty-first Legislative Assembly.

WHEREAS, there are many Montana governmental agencies in the Helena area housed in nonstate-owned buildings; and

WHEREAS, the supervision and administration of Montana state government should better be served if such governmental agencies were housed within the framework of the capitol complex; and

WHEREAS, the general public would be better served if a central location were provided for such governmental agencies, thereby making them more easily accessible; and

WHEREAS, these agencies now pay rental fees for private housing in the Helena area exceeding ninety thousand dollars (\$90,000) a year; and

WHEREAS, according to the state controller such rental fees are certain to increase as the need to house additional state agencies in private facilities increases, and as rental fees rise, and the time rapidly approaches when such fees may easily exceed one hundred thousand dollars (\$100,000) a year.

NOW, THEREFORE, BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES OF THE STATE OF MONTANA:

That the State Board of Examiners and the State Controller examine the need for a state-owned office building to house, but not be limited to such state agencies or their subdivisions as the following: Adjusted Compensation Division, State Electrical Board, Montana Employment Service, Highway Gross Vehicle Weight Division, Highway Patrol, Milk Control Board, State Board of Nursing, Oil and Gas Conservation Commission, State

Board of Food Distributors, State Board of Health, State Library Commission, Superintendent of Public Instruction, Teachers Retirement System, Veterans Welfare Commission and Division of Vocational Rehabilitation, and that if it is to the economic and administrative advantage of the state of Montana that they authorize the construction of such a building as may be determined necessary for immediate and long-range housing needs, and that the revenues earmarked in current and future appropriations for the rent of the agencies to be housed therein, be used to redeem such bonds.

BE IT FURTHER RESOLVED, that the Board of Examiners and the State Controller report their findings to the Forty-first Legislative Assembly.

BE IT FURTHER RESOLVED, That the clerk of the House of Representatives is directed to send copies of this resolution to the Board of Examiners and the State Controller.

9 axles	105,500 pounds

This subdivision shall have no application to highways which are a part of the National System of Interstate and Defense Highways (as referred to in Section 127 of Title 23, United States Codes) when such application would prevent this state from receiving any federal funds for highway purposes.

(d) The distance between axles shall be measured to the nearest foot. When a fractional measurement is exactly one-half ( $\frac{1}{2}$ ) foot the next larger whole number shall be used.

(e) The maximum axle and axle group loads stated in paragraphs (a), (b) and (c) of clause [(4)] (5) above are subject to reasonable reduction in the discretion of the state highway commission during periods when road subgrades have been weakened by water saturation or other causes.

(f) The operation of vehicles or combinations of vehicles having dimensions or weights in excess of the maximum limits herein recommended shall be permitted only if and when authorized by special permit

issued by the state highway commission or its officers, supervisors or agents acting pursuant to duly delegated authority from said commission, including the Montana highway patrol.

(g) Nothing contained in this section shall be deemed to authorize without a permit issued as provided by law, the operation of any combination of vehicles having any gross weight, axle load or size in excess of that authorized in this section, or the operation of any combination of vehicles on the National System of Interstate and Defense Highways having any gross weight or size in excess of that permitted by operation of law in this state prior to July 1, 1956, or by federal law or regulation in excess thereof, which may be hereafter adopted. If federal law allows establishment of size and weight limits in excess of those permitted in this section, without penalty or denial of federal funds for highway purposes, the state highway commission may authorize the movement on highways under its jurisdiction of vehicles or combinations of vehicles of a size or weight in excess of the limits provided for in this section, but within the limits necessary to qualify for federal aid highway funds."

(Material in brackets denotes cancelled type.)

Section 2. Section 32-1127, R.C.M. 1947, is amended to read as follows:

"32-1127. Permits for excess size and weight. The state highway commission, and local authorities in their respective jurisdiction, may, in their discretion, upon application in writing and good cause being shown therefor, issue a special permit in writing, authorizing the applicant to operate or move a vehicle of a size or weight exceeding the maximum specified in this act upon any highway under the jurisdiction of and for the maintenance of which the body granting the permit is responsible; provided, however, that only the state highway commission shall have the discretion to issue permits for movement of vehicles carrying built-up or reducible loads in excess of nine (9) feet in width or exceeding the length, height, or weight specified in this act said permit shall be issued in the public interest; provided, however, that any carrier receiving this permit must have public liability and property damage insurance for the protection of the traveling public as a whole. No permit shall be issued for a period of more than nine (9) months.

The applicant for any special permit shall specifically describe the powered vehicle or towing vehicle and generally describe the type of vehicle or load to be operated or moved and the particular state highways over which the vehicle or load is to be moved and whether such permit is required for a single trip or for continuous operation. All fees collected under this act shall be forwarded to the state treasurer for deposit in the state highway general fund.

(a) Special Permits — Discretion of Issuer — Conditions. The state highway commission or local authority is authorized to issue or withhold such special permit at its discretion, or, if such permit is issued, to limit the number of trips, or to establish seasonal or other time limitations within which the vehicle described may be operated on the public highways indicated, or otherwise to limit or prescribe conditions of operation of such vehicle or vehicles when necessary to assure against damage to the road foundation, surfaces or structures or safety of traffic and may require such undertaking or other security as may be deemed necessary to compensate for injury to any roadway or road structure.

(b) Special Permits—Fees. The following fees, in addition to the regular license and gross vehicle weight fees, shall be paid for all movements under special permits on the public highways under the jurisdiction of the state highway commission:

Three dollars (\$3.00) for each permit issued in excess of the size and weight specified in this act; provided, however, that term or blanket permits shall not be issued for overwidth loads in excess of fifteen (15) feet,

overlength loads in excess of seventy (70) feet and combinations of vehicles in excess of one hundred five (105) feet, and overheight loads in excess of a limit determined by the state highway commission. Loads in excess of these dimensions will be limited to trip permits.

In addition to the three dollar (\$3.00) fee specified herein for overweight permits, there shall be charged for single trip permits: five dollars (\$5.00) for distances to and including one hundred (100) miles; fifteen dollars (\$15.00) for distances from one hundred one (101) to one hundred ninety-nine (199) miles; and twenty-five dollars (\$25.00) for distances over two hundred (200) miles traveled, for such excess load over the gross allowable load specified in this section or the sum of the excess axle loads, whichever is greater.

(c) Special Permits—Misrepresentations and Violations—Penalty—Display of Permit. Any person who knowingly and willfully misrepresents the size or weight of any load in obtaining a special permit or does not follow the requirements and conditions of the special permit or who operates any vehicle, the gross weight of which is in excess of the maximum for which such vehicle may be eligible for license, without first obtaining a special permit, is guilty of a misdemeanor.

Every special permit issued hereunder shall be carried in the vehicle or combination of vehicles to which it refers and shall be open to inspection by any peace officer, officer of the Montana highway patrol, or employees of the state highway commission.

A peace officer, officer of the Montana highway patrol, or employees of the state highway commission who shall find any person operating a vehicle in violation of the conditions of a special permit issued hereunder may confiscate such permit and forward the same to the state highway commission which may return it to the permittee or revoke, cancel, or suspend it without refund. The state highway commission shall keep a record of all action taken upon permits so confiscated and if a permit shall be returned to the permittee, the action taken by the commission shall be endorsed thereon. Any permittee whose permit is suspended or revoked may, upon request, receive a hearing before the commission or person designated by the commission. The commission, after such hearing, may reinstate any permit or revise its previous action."

Such disqualification shall continue for the week in which such failure occurred and for not less than two (2) nor more than five (5) weeks in addition to the waiting week which immediately follow such week as determined by the commission according to the circumstances in each case.

(1) In determining whether or not any work is suitable for an individual, the commission shall consider the degree of risk involved to his health, safety, and morals, his physical fitness and prior training, his experience and previous earnings, his length of unemployment and prospects for securing local work in his customary occupation, and the distance of the available work from his residence.

(2) Notwithstanding any other provisions of this act, no work shall be deemed suitable and benefits shall not be denied under this act to any

otherwise eligible individual for refusing to accept new work under any of the following conditions:

(A) If position offered is vacant due directly to a strike, lockout, or other labor dispute;

(B) If the wages, hours, or other conditions of the work offered are substantially less favorable to the individual than those prevailing for similar work in the locality;

(C) If as a condition of being employed the individual would be required to join a company union or to resign from or refrain from joining any bona fide labor organization.

(d) For any week with respect to which the commission finds that his total unemployment is due to a stoppage of work which exists because of a labor dispute at the factory, establishment, or other premises at which he is or was last employed, provided that this subsection shall not apply if it is shown to the satisfaction of the commission that—

(1) He is not participating in or financing or directly interested in the labor dispute which caused the stoppage of work; and

(2) He does not belong to a grade or class of workers of which immediately before the commencement of the stoppage, there were members employed at the premises at which the stoppage occurs, any of whom are participating in or financing or directly interested in the dispute;

Provided, that if in any case separate branches of work which are commonly conducted as separate businesses in separate premises are conducted in separate departments of the same premises, each such department shall, for the purpose of this subsection, be deemed to be a separate factory, establishment, or other premises; provided, further that if the commission, upon investigation, shall find that such labor dispute is caused by the failure or refusal of any employer to conform to the provisions of any law of the state wherein the labor dispute occurs or of the United States pertaining to collective bargaining, hours, wages or other conditions of work, such labor dispute shall not render the workers ineligible for benefits.

(e) For any week with respect to which he is receiving or has received payments in the form of—

(1) Wages in lieu of notice or separation or termination allowance;

(2) Compensation for disability under the Workmen's Compensation Law or the Occupational Disease Law of this or any other state or under a similar law of the United States;

(3) Benefits under the Railroad Unemployment Insurance Act or any state unemployment compensation act or similar laws of any state or of the United States. This disqualification does not apply to any week with respect to which an individual is receiving or has received benefits under an unemployment compensation law of another state or of the United States, if any such benefits are paid pursuant to Section 87-129.

Receipt of any wages, compensation or benefits as set forth in subsections (1), (2), or (3) above, after payment of unemployment benefits, and with respect to the same week for which unemployment benefits were received, will thereupon require such individual to repay such unemployment benefits and the commission may collect such unemployment benefits in the same manner as provided for collection of benefits under Section 87-145 (d).

(f) During the school year (within the autumn, winter and spring seasons of the year) or the vacation periods within such school year or during any prescribed school term if claimant is a student regularly attending an established educational institution.

(g) For any week wherein claimant leaves her most recent work to be married. Such disqualification shall cancel all existing wage credits and shall continue until such time as subsequently to such week additional wage credits shall have been earned so as to be eligible for benefits under Section 87-105.

(h) Where retired and entitled to receive retirement compensation in excess of one hundred dollars (\$100.00) per calendar month paid in whole or in part from funds furnished by an employing unit, such disqualification to be applied as follows: All wages earned by such individual in the employment from which he has been retired shall not be considered or included in determining his wage credits or weekly benefit amount under Sections 87-103 or 87-105. No benefit payments or amounts paid any retired individual shall ever be charged under Section 87-109 against any employing unit from whose employment the individual is retired and entitled to receive retirement compensation, on account of that particular employment, unless and until the commission shall determine (upon hearing, if requested by employer, and after at least ten (10) days' written notice of such hearing to said employer) that the individual was not retired by the employer acting in good faith. This disqualification does not extend to the receipt of benefits under the Federal Social Security Act, as amended.

(i) For any week wherein claimant leaves her most recent employment during pregnancy, and due to such pregnancy, and such disqualifications shall continue through the period of pregnancy unless claimant presents evidence of her physical ability to work at such employment. At any time after the seventh month of pregnancy a claimant, to establish eligibility must present evidence of physical ability to work at such employment. Further, at any time during the first two (2) months following childbirth, a claimant, to establish eligibility, must present evidence of her physical ability to work at such employment. In any of the cases set forth hereinbefore, such evidence of eligibility must be in the form of a certificate of a duly licensed physician that such claimant is physically able to work at her most recent employment, and such evidence must be presented as often as requested by the commission. No benefit payments or amount paid any individual after having left work because of pregnancy or childbirth shall ever be charged under Section 87-109 against the employer (whose employment the individual left because of pregnancy or because of childbirth) on account of that particular employment.

(j) For any week wherein claimant leaves her most recent work to change her place of residence in order to remain with her husband or relative. Such disqualification shall cancel all existing wage credits and shall continue until such time as subsequently to such week additional wage credits shall have been earned so as to be eligible for benefits under Section 87-105."

Section 4. Section 87-109, R.C.M., 1947, is amended to read as follows:

"87-109. Contributions. (a) Payment. (1) [On and after January 1, 1937,] Contributions shall accrue and become payable by each employer for each calendar year in which he is subject to this act, with respect to wages as defined in Section 87-149 (c), paid for employment (as defined in this act) occurring during such calendar year. Such contributions shall become due and be paid by each employer to the commission for the fund in accordance with such regulations as the commission may prescribe and shall not be deducted, in whole or in part, from the wages of individuals in his employ.

(2) In the payment of any contributions, a fractional part of a cent shall be disregarded unless it amounts to one-half ( $\frac{1}{2}$ ) cent or more, in which case it shall be increased to one (1) cent.

(b) Rate of Contribution. (1) Each employer shall pay contributions [equal to the following percentage] at the rate of three and three-

tenths (3.3) per centum of wages, as defined in Section 87-149 (c), paid by him with respect to such employment[:].

[(A) One and eight-tenths (1.8) per centum with respect to employment during the calendar year 1937;]

[(B) Two and seven-tenths (2.7) per centum with respect to employment during the calendar years 1938, 1939, 1940, 1941, and for each calendar year thereafter,] except as [herein] provided in subsection (c) of this section.

(c) Experience rating. The commission shall for [the calendar year 1947 and for] each calendar year [thereafter], classify employers in accordance with their actual contribution and unemployment experience and shall determine for each employer the rate of contribution which shall apply to him throughout the calendar year in order to reflect said experience and classification. The commission shall apply such form of classification or experience rating system which is best calculated to rate individually and most equitably the employment for each employer and to encourage the stabilization of employment. In making such classification, the commission shall take account, each to an equal extent, of the following factors relating to the unemployment hazard shown by each employer on the basis of (1) average annual net percentage declines in taxable payrolls for the last three (3) years prior to computation date; (2) number of years the employer has paid contributions; and (3) chargebacks to the individual employer account upon the last employer basis. The computation date is hereby fixed as of the close of business on June 30th of the preceding calendar year.

The rates for the second calendar quarter of calendar year [1961] 1967 and thereafter, except as hereinafter provided, shall be so fixed that they would, if applied to all employers and their total taxable annual payrolls for the preceding calendar year, have yielded total paid contributions equaling approximately [one and five-tenths (1.5)] one and sixty-five hundredths (1.65) per centum of the total of all such payrolls.

The commission shall determine the contribution rate applicable to each employer for any calendar year subject to the following limitations:

(1) [Each employer's rate shall be two and seven-tenths (2.7) per centum unless and until there have been five (5) years prior to the computation date throughout which the employer has paid contributions at the rate of two and seven-tenths (2.7) per centum.] Each employer who has paid contributions for less than five (5) years prior to the computation date shall pay contributions at the rate of two and seven-tenths (2.7) per centum until completion of such five (5) year period, except that if at any time after the first two (2) years it is determined that benefit payments charged to such employer's account during the years prior to any computation date, exceeded the amount of his contributions for those years, then his contribution rate shall increase to three and three-tenths (3.3) per centum for the balance of the five (5) year period, unless he makes a voluntary contribution as provided in Section 87-109 (c) (4). Such voluntary contribution must be applied first to the earliest of the five (5) years and then to subsequent years in the order provided in Section 87-109 (c) (4).

(2) The classified contribution rates [for the calendar year 1947, and thereafter, except as hereinafter provided, shall be: one (1.0) per centum, one and one-half (1.5) per centum, two (2.0) per centum, two and one-half (2.5) per centum, and two and seven-tenths (2.7) per centum. The classified contribution rates] for the calendar year [1953] 1967 and thereafter, except as hereinafter provided, shall be: five-tenths (.5) of one per centum, seven-tenths (.7) of one per centum, nine-tenths (.9) of one per centum, one and one-tenth (1.1) per centum, one and three-tenths (1.3) per centum, one and five-tenths (1.5) per centum, one and seven-tenths (1.7) per centum, one and nine-tenths (1.9) per centum, two and one-tenth (2.1) per centum, two and three-tenths (2.3) per centum, two and five-tenths (2.5)

per centum, two and seven-tenths (2.7) per centum, two and nine-tenths (2.9) per centum, three and one-tenth (3.1) per centum and three and three-tenths (3.3) per centum.

(3) No employer shall be assigned a classified contribution rate higher than the second classified rate above the rate which was assigned to him for the last preceding calendar year except for the year [1961] 1967 and further as hereinafter provided.

(4) No employer's rate shall be fixed below [two and seven-tenths (2.7)] three and three-tenths (3.3) per centum whose benefit payments charged as most recent employer have, in the last three (3) years preceding the computation date, exceeded the amount of his contributions for those years, provided, that [for the calendar year 1957 and thereafter,] any employer may, for the purpose of avoiding the provisions of this subsection, have the option of making a voluntary contribution to the unemployment compensation fund to cancel the amount by which the benefit payments charged to him under Section 87-109 (c) during the last three (3) completed fiscal years exceed his contributions for the same three (3) years. Such voluntary contribution shall be applied first to cancel the amount by which benefits exceed contributions in the earliest of the three (3) years preceding the computation date, any remaining to cancel the excess in the second earliest year preceding the computation date, and any further remaining to cancel the excess in the most recent year preceding the computation date. Whenever the benefit payments charged to an eligible employer in the last three (3) fiscal years exceed his contributions for the same period, the commission shall notify him of the amount of such excess and the rate which would be applicable to him for the ensuing calendar year, if he exercises the option. Such employer must exercise the option of making the voluntary contribution allowed by this section within thirty (30) days after receipt of such notice; otherwise his rate for the ensuing calendar year shall be fixed at [two and seven-tenths (2.7)] three and three-tenths (3.3) per centum.

(5) Rates as fixed by the commission shall stand and be in effect unless and until the cash reserves in the unemployment compensation trust fund at any time in the future fall below, and remain below, eighteen million dollars (\$18,000,000.00) continuously for a period of one (1) year, then employer rates effective at the beginning of the next succeeding calendar quarter shall be so fixed that they would, if applied to all employers and their total taxable annual payrolls for the preceding calendar year, have yielded total paid contributions equalling approximately two (2) per centum of the total of all such payrolls, and shall continue at the two (2) per centum average rate until cash reserves in the unemployment compensation trust fund exceed twenty-six million dollars (\$26,000,000.00) at which time all employer rates shall again be so fixed to bring an average return of [one and five-tenths (1.5)] one and sixty-five hundredths (1.65) per centum as in this section hereinabove provided; if reserves remain below eighteen million dollars (\$18,000,000.00) continuously for a period of two (2) years, then the contribution rate of all employers subject to this act shall return to a uniform rate of [two and seven-tenths (2.7)] three and three-tenths (3.3) per centum effective at the beginning of the next succeeding calendar quarter, and shall continue at the [two and seven-tenths (2.7)] three and three-tenths (3.3) per centum rate until cash reserves in the unemployment compensation trust fund exceed twenty-six million dollars (\$26,000,000.00) at which time all employer rates shall again be so fixed to bring an average return of [one and five-tenths (1.5)] one and sixty-five hundredths (1.65) per centum as in this section hereinabove provided.

(6) The commission shall by regulation adopt such procedures as may be necessary for the substitution, merging or acquisition of any employer account by an employing unit, and the transfer of such employer account rights, contributions, benefit experience and ratings to the successor employing unit or units.

(7) The commission shall by regulation provide for the proper notification of employers of the classification and rate of contributions applic-

able to their accounts. Such notification shall be final for all purposes unless and until such employer files a written request with the commission for a redetermination or hearing thereon within thirty (30) days after receipt of such notice. The provisions of Section 87-107 applicable to appeals under claims procedure shall apply with like purpose and effect, and be applicable to hearings and request for redeterminations of classifications and rates of contribution filed by employers hereunder.

(8) 'Annual taxable payroll' means the total of the four (4) quarters of taxable payrolls of an employer preceding the computation date as fixed herein.

(9) No employer's account shall be charged with benefits paid to any claimant in determining the contribution rate of such employer unless the employer has had notice of the claim for benefits and has been given opportunity for hearing as an interested party in the manner provided in Sections 87-107 and 87-108. Written notice of any hearing shall be mailed to employer not less than ten (10) days prior to the date set.

(d) Wages in excess of three thousand dollars (\$3,000.00). [Commencing January 1, 1941,] The provisions of this act requiring the payment of contributions by employers subject to this act shall apply only to wages paid up to and including three thousand dollars (\$3,000.00) by an employer to an employee with respect to employment during any calendar year."

(Material in brackets denotes cancelled type.)

Section 5. If any clause, sentence, section, paragraph or part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid or inoperative, such judgment shall not affect, impair, or invalidate the remainder of this act but shall be confined in its operation to the clause, sentence, section, paragraph or part directly adjudged to be invalid or inoperative.

Section 6. All acts or parts of acts in conflict herewith are hereby repealed.

Section 7. Sections 1, 2, and 3 of this act shall be in full force and effect on and after April 2, 1967, and Sections 1, 2 and 3 shall apply to all benefit years beginning on and after April 2, 1967, and the insured status of all claimants who have a benefit year current on or after April 2, 1967, shall be redetermined and benefits shall be paid in accordance with this provision, provided that no insured worker shall have his benefits reduced or denied by redetermination resulting from the application of this provision; Section 4 of this act shall be in full force and effect on and after April 1, 1967.

And as amended, do pass.

#### REPORT OF STANDING COMMITTEES

February 7, 1967

Mr. Speaker: We, your Committee on Education, having had under consideration House Bill No. 360, respectfully report as follows: That House Bill No. 360 be amended as follows:

Amend by striking out all of the title following the names of the authors and all of the bill following the enacting clause and substituting in lieu thereof the following amendments:

A bill for an act entitled: "An act to amend Section 75-1630, R.C.M. 1947, to provide that with the exception of certain situations, public elementary school children must obtain written consent of the board of trustees of the district in which they reside, the written consent of the board of trustees in the district in which they propose to attend school, as well as the written consent of the various county superintendents of schools concerned before they are permitted to attend a public elementary school in another district whether within or without the county in which the children reside."

Be It Enacted By The Legislative Assembly of The State of Montana:

Section 1. Section 75-1630, R.C.M. 1947, is amended to read as follows:

"75-1630. Transfer of funds. Children may attend public elementary schools in districts in the county outside of the district in which they reside, or in a district in an adjoining county, or in a district in a county in another state when the district in such other state adjoins the district in which they reside, or is situated in a county in such other state, which county adjoins the state of Montana, when written permission is

secured from the board of trustees of the district in which they reside, the board of trustees of the district in which they are to attend school, and when written permission has been given by the county superintendents of schools of the counties concerned [county in which the children reside.] Permission must be granted for such attendance in another district within or without the county of such children's residence when the following conditions exist:

(Material in brackets denotes cancelled type.)

1. When a child lives less than three (3) miles from a public elementary school in another district or county and three (3) or more miles from a public elementary school in the district or county of his own residence.

2. When a child resides more than three (3) miles distance from a public elementary school within his own district or county and no transportation is furnished by the home district or county to such school.

3. When regular bus transportation is furnished by a public elementary school in another district or county and his own district or county does not furnish transportation.

Such distances mentioned above shall be measured from the point where the private family dwelling house is situated to the schoolhouse by the shortest traveled route.

4. When a family has children who must attend high school outside of its own district or county and such family also has elementary school children who can more conveniently attend the elementary grades in the same district where the high school is located, provided such elementary children live more than three (3) miles from the home school or that a parent must move to town to provide high school education for his children.

5. When the county superintendent of schools of the county where the child resides, for any other reason than stated above shall approve the attendance of any child in a public elementary school in another county. In approving such attendance in another district or county, the county superintendent shall take in consideration such items as distance to school, road conditions, trading center of parents, opportunity to live with relatives, dormitory facilities, living conditions, transportation and type of educational program.

If the board of trustees of the district to be attended shall find that, due to insufficient room and overcrowding the accreditation of the receiving school in the ensuing school year would be adversely affected by acceptance of a transfer pupil from another school district, the board may disapprove the attendance provided it mails written notice of disapproval to the parents or guardian of the pupil within fifteen (15) days after written notification by the county superintendent of the proposed attendance.

In the event that the residence, for determining tuition obligations, of such child is in dispute, then the rules for determining residence as outlined in section 83-303, shall be used by the county superintendent of the county of the child's residence, or in case the dispute is between districts of two counties by the county superintendents of such counties, to finally determine the residence of such child.

When approval of attendance in another district within or without the county has been granted, the district in which such child resides shall pay to the school district where such child attends, an amount based on the following tuition rates: in the case of attendance at an elementary school with an average number belonging up to one hundred (100), the tuition to be paid shall be two hundred seventy-five dollars (\$275); where the school attended has an average number belonging between one hundred one (101) and three hundred (300), the tuition shall be two hundred fifty dollars (\$250); and where the school attended has an average number be-

longing over three hundred (300), the tuition rate shall be two hundred twenty-five dollars (\$225) per pupil.

It is hereby made the duty of the board of school budget supervisors in approving the budgets, to include therein an item to care for the above tuition, if this has not already been done by the board of trustees in preparing the budget for the district.

Applications for permission to attend a school outside the district or county shall be made to the county superintendent before July 1, previous to the year of attendance, excepting in those cases where circumstances prevent such application. These applications are to be approved or disapproved, except as otherwise provided by law, by the county superintendents concerned by the trustees of the district in which the pupil resides, and by the trustees of the district the pupil wishes to attend. However, nothing in this section shall be so construed as to deny a parent whose children cannot qualify under this section the right to send his children, at his own expense, to a public elementary school of any other district willing to accept them. Such parent must pay to the receiving district, tuition in the amount set forth herein.

At the close of the school term of the year in which such pupil attends this school outside the district, the clerk of such district shall transmit to the county superintendent the names of pupils from other districts attending his school, together with the number of days attended. This information in turn shall be transmitted by the county superintendent to the districts affected and such district shall reimburse the school attended for all pupils of its district; provided such pupil has attended at least forty (40) days. This amount of reimbursement shall be made an item of the budget for the coming year and reimbursement shall be made to the district of attendance out of the first funds available to the budget; provided, however, that the trustees of the district receiving pupils from another district may waive any or all tuition; provided, however, that such waiver must apply equally to all pupils, and provided, further, that the amount of this tuition shall not reduce the foundation program of the school paying it, but shall be an additional item added to it to be raised without a vote of the people; and provided further, that the district receiving the tuition may apply it against the needs of the budget after the regular district, county and state aid have been received.

In the case of a district which does not operate a school, the amount of this tuition can be raised without a vote of the people if the five (5) mill district levy and other local revenue is insufficient to raise the amount needed.

It shall be the responsibility of the superintendent of schools and the boards or trustees of the public elementary schools sending and receiving the pupils and the county superintendents of the schools concerned [of the county of the pupils' residence] to determine and agree upon eligibility of pupils transferring under the provisions of this act; provided, that an appeal may be taken to the state superintendent of public instruction.

(Material in brackets denotes cancelled type.)

Whenever elementary pupils residing in Montana are approved for attendance in an elementary school in an adjoining state; and whenever elementary pupils in an adjoining state are approved for attendance in an elementary school in Montana, the above schedule of tuition payments may be waived and payments arrived at on a reciprocal basis with the state involved. The state superintendent of public instruction is hereby authorized to negotiate with the state superintendent of public instruction of each state involved in arriving at tuition payments, which may either be on a per pupil basis of a flat amount or on an actual cost basis.

Whenever a child has been declared by a district court of the state of Montana a dependent and neglected child as defined in section 10-501, or a juvenile delinquent child, as defined in section 10-602, and has been ordered to be placed in a duly licensed child care institution in the state

of Montana, which institution is approved by the state department of public welfare, and as a result of such order such child is required to attend a public elementary school in a school district outside of the district in which he resides the district receiving such pupil shall be entitled to receive tuition on the basis of the schedule established in this act, provided that the geographical relationship of the receiving district to the district of residence shall be of no consequence. All other provisions of this section, excepting solely the geographical relationship of the districts, shall be applicable to the payment of tuition for the education of such child."

And as amended, do pass.

Be It Enacted By The Legislative Assembly of The State of Montana:

Section 1.

1. It is the public policy of the state to safeguard the health and well-being of citizens of the state with reference to the use of blood in the treatment of many human diseases, as well as its use in treatment of injuries as result of casualties or disasters. Use of blood in this manner has increased to such proportions that, in the public interest there is need for establishing minimum standards for the control and licensing of the activities of blood banks.

2. For the purposes of this act, unless otherwise required by the context;

(c) "Blood" means human blood or human plasma;

(e) "Collection" means the obtaining of blood by the bleeding of donors;

(f) "Processing" means the technical stages required to prepare and identify the blood as to its suitability;

(g) "Storage" means the holding of blood in connection with collection or processing prior to distribution or transfusion;

(j) "Board" means the state board of health.

3. No person shall hereafter operate or conduct a blood bank in this state unless duly licensed by the state board of health under the provisions of this act. The licenses required by this act shall be in addition to any other license or permit required by any board of health or other body exercising the powers of such a board in any municipality or district in this state. Licenses hereunder shall not be transferrable and a new license is required whenever location, ownership, or medical director of a bank is changed.

All such licenses shall expire on December 31 in each calendar year and applications for renewal therefor shall be made on or before November 10 on forms provided by the board of health. A fee of twenty-five dollars (\$25) shall accompany the original application for a license and ten dollars (\$10) for each renewal thereof. The original or a certified copy of the license shall be conspicuously displayed by the licensee at the premises occupied as a blood bank.

4. A license shall be issued to any person who has been conducting a blood bank prior to the effective date of this act upon submission of a properly completed application form and payment of an application fee of twenty-five dollars (\$25). Said license shall be renewable as provided in this act and shall be subject to all the provisions of this act.

5. No licensee shall collect blood hereafter unless he has first obtained from the prospective donor a completed registration statement which shall set forth the name and address of the donor and shall contain such other information as the rules and regulations adopted hereunder shall require.

## Section 2.

1. The standards of operation for blood banks, including standards for the collection, processing, storage, and distribution of blood for therapeutic or prophylactic purposes shall be established by rules and regulations adopted and promulgated by the State Board of Health. Such rules and regulations shall be incorporated in and made a part of the rules and regulations of the State Board of Health.

(c) Standards for collection, processing, storage, and distribution of blood, including but not limited to methods, labeling and container identification, necessary laboratory tests, inspections and dating.

(d) Evaluation of performance of blood banks.

3. In making any such rules and regulations the State Board of Health shall take into account any limitations which may result from local conditions or problems arising from the geographical location, or the medical, paramedical, or personnel problems and needs of the locality.

## Section 3.

1. Any license issued in accordance with the provisions of this act may be suspended or revoked by the State Board of Health, or its agent duly authorized to act, for a violation of any of the provisions of this act.

2. The board, before refusing to grant a license, or before suspending or revoking a license previously granted, except as hereinafter provided in subsection 4 hereunder, shall give or cause to be given notice to the applicant or licensee personally, or by mail addressed to him at his last known address, and afford him an opportunity to be heard with respect thereto at a time and place specified in such notice. The board, or its duly authorized agents, shall have the power and authority to enter and inspect any blood bank and to make such investigation of the premises and the books and records as is reasonably necessary to carry out the provisions of this act.

It shall be the violation of this act for any person to obstruct, hinder, delay or interfere, by force or otherwise, with the performance by the board or its duly authorized agents, of any duty under the provisions of this act.

4. If the board, or its executive officer, shall have reason to believe that a condition exists or has occurred at a blood bank, in violation of the provisions of this act, which is dangerous to the public health, it may order such blood bank to correct such violation and may suspend the license of the blood bank until such correction is completed. If a licensee shall deny that a violation exists or has occurred, he shall have the right to apply to the board for a hearing which hearing may be held before the executive officer of the board or some agent duly authorized by the board to hold such. Such hearing shall be held and a decision rendered within forty-eight (48) hours of the receipt of said request. If the board, the executive officer, or a duly authorized agent for such, shall rule against the licensee, the licensee shall have the right to apply for injunctive relief against such order. Jurisdiction for such injunctive relief shall be in the district court.

5. Any person who violates the provisions of this act or any order of the board shall be liable for the first offense to a penalty, to be established by the board, of not less than one hundred dollars (\$100) nor more than one thousand dollars (\$1,000) and for the second and each succeeding offense for a penalty of not less than five hundred dollars (\$500) nor more than five thousand dollars (\$5,000). Each day of continued operation shall constitute a separate offense. The penalties herein provided shall be enforced by the board as plaintiff in a summary proceeding in the district court.

Amend by striking out all of title of said bill and all of said bill following the names of the authors and substituting in lieu thereof the following amendments:

A bill for an act entitled: "An act to provide for the zoning by the legislature of certain lands adjacent to the interstate and primary system highways as commercial and for zoning and rezoning in certain cases by the boards of county commissioners, or through their authority in accordance with presently existing or hereafter enacted statutes; to provide that the zoning hereby effected shall not, in itself, affect any taxes levied against real property or any assessment or assessment classification; to provide for the control of outdoor advertising adjacent to the interstate and primary systems; to provide for the administration of such outdoor advertising controls; all in conformity with the Federal Highway Beautification Act of 1965; and containing a severability clause."

Be It Enacted By The Legislative Assembly of The State of Montana:

Section 1. Declaration of policy. The legislature recognizing the public investment in highways and in justification of these expenditures, particularly the cost of maintenance which is borne wholly by state funds, finds and declares that it is necessary to promulgate a public policy of the state zoning with uniform application adjacent to the interstate and primary systems within this state to promote their maximum utilization by encouraging the development of roadside businesses to serve the needs and pleasures of the travelling public, as well as to stimulate tourism, commerce, and for purposes of planning the general growth of the state's

economy. Further, desiring to insure reasonable compliance with the Highway Beautification Act of 1965, it is the intention of the legislature in this act to provide a statutory basis for the regulation of outdoor advertising consistent with the public policy relating to areas adjacent to the interstate and primary systems as declared herein and by Congress in Title 23, United States Code, "Highways".

Section 2. Definitions. As used in this act:

(a) "Interstate system" means that portion of the national system of interstate and defense highways located within this state, as officially designated, or as may hereafter be so designated, by the state highway commission, and approved by the secretary of commerce or secretary of transportation, pursuant to the provisions of Title 23, United States Code.

(b) "Primary system" means that portion of connected main highways, as officially designated, or as may hereafter be so designated, by the state highway commission, and approved by the secretary of commerce or secretary of transportation, pursuant to the provisions of Title 23, United States Code.

(c) "Sign" or "outdoor advertising" means an outdoor sign, display, light, device, figure, painting, drawing, message, plaque, poster, billboard, or other thing which is designed, intended or used to advertise or inform, any part of the advertising or informational contents of which is visible from any place on the main-travelled way of the interstate or primary systems.

(d) "Erect" means to place, construct, create, or bring into being a sign, display or device, but does not include changing copy upon, or the repair or replacement of, an existing legal sign, display or device.

(e) "Maintain" means to allow to exist.

(f) "Unzoned commercial or industrial area" means an area as defined and determined under section 5.

(g) "Municipality" means an incorporated city, town, or village, but does not include counties, townships, or other rural areas.

Section 3. Limitations on outdoor advertising. Subject to the provisions for the removal of nonconforming signs and the payment of just compensation therefor, contained in sections 8 and 9 herein, no sign shall, after January 1, 1968, be erected or maintained within 660 feet of the nearest edge of the right-of-way and visible from the main-travelled way of any highway which is a part of the interstate or primary system in this state, except the following:

(a) Official signs, including directional signs and notices, which shall include, but not be limited to, signs and notices pertaining to natural wonders, scenic and historic attractions, as authorized or required by law, subject to national standards to be promulgated by the secretary of commerce or the secretary of transportation.

(b) Signs advertising the sale or lease of property upon which they are located.

(c) Signs advertising activities conducted, services rendered, goods sold, stored, produced or mined, or the name of the enterprise on the property upon which they are located.

(d) Signs in areas which are now or hereafter zoned industrial, commercial, or the like, under section 4 or otherwise, subject to the regulations set forth in section 6 concerning size, lighting and spacing.

(e) Signs in unzoned commercial or industrial areas, which now or hereafter qualify as such, as defined in, and determined under section 5, subject to the regulations set forth in section 6 concerning size, lighting and spacing.

Section 4. Areas hereby zoned commercial.

(a) The legislature, to the extent hereinafter provided, and to effectuate the declared purposes of this act, hereby zones all of the following described lands located outside of municipalities and lying within 660 feet of the nearest edge of the right-of-way of any highway which is part of the interstate and primary system, as commercial, effective as of the effective date of this act:

(1) For a distance of ten (10) miles directly along, and without deviation from, the routes thereof outside of and beyond the corporate limits of municipalities of the first class as defined in section 11-201, R.C.M., 1947;

(2) For a distance of five (5) miles directly along, and without deviation from, the routes thereof outside of and beyond the corporate limits of municipalities of the second class as defined in section 11-201, R.C.M., 1947;

(3) For a distance of five (5) miles directly along, and without deviation from, the routes thereof outside of and beyond the corporate limits of municipalities of the third class as defined in section 11-201, R.C.M., 1947;

(4) For a distance of three (3) miles directly along, and without deviation from, the routes thereof outside of and beyond the corporate limits of municipalities classified as towns in section 11-201, R.C.M. 1947;

(5) For a distance of three (3) miles directly along, and without deviation from, the routes thereof outside of and beyond the limits of unincorporated cities or towns.

The zoning, which is effected hereby, is subject to the exceptions specified in subsection (b) and to zoning by the several boards of county commissioners, or under their authority, as provided in subsection (e).

(b) Lands not so zoned. No lands are hereby zoned commercial, as aforesaid, which are:

(1) Within 500 feet of any building used primarily as a residence, unless the owner of the building consents in writing to the particular commercial use or uses to be made of such lands;

(2) In, or within 500 feet of, any official park, garden, or forest preserve, publicly owned, controlled, and maintained, or within 500 feet of a church or school;

(3) In, or within 500 feet of, any officially designated historical battlefield, or within 500 feet of any museum, publicly owned, controlled and maintained;

(4) In, or within 500 feet of, any official picnic grounds or swimming beach, publicly owned, controlled, and maintained, or any golf course, publicly or privately owned or maintained;

(5) In, or within 500 feet of, any safety rest or recreation area, publicly owned, controlled, and maintained pursuant to Section 319 of Title 23 of the United States Code;

(6) Within 500 feet of any sanitary or other facility for the accommodation of the motorist, publicly owned, controlled, and maintained pursuant to Section 319 of Title 23 of the United States Code;

(7) In, or within 500 feet of, any strip of land, an interest in which has been acquired by this state for the restoration, preservation, or enhancement of scenic beauty, and which is publicly controlled and maintained, pursuant to Section 319 of Title 23 of the United States Code;

(8) Specifically zoned non-commercial or non-industrial under the authority of presently existing zoning statutes or zoning statutes hereafter enacted in this state.

The foregoing provisions of this subsection shall be so interpreted as to protect the uses, activities and features above specified, whether now in existence or hereafter established. In addition, any area zoned commercial, as hereinbefore provided, which is otherwise inappropriate for the commercial uses specified in subsection (c) shall be promptly rezoned in such a manner as to prohibit such uses therein, as provided in subsection (e), but subject to the protection of agricultural activities and private residential uses as therein specified.

(c) Permitted uses. The following uses and activities, subject to the regulations specified in subsection (d) concerning reasonable zoning regulations by the several boards of county commissioners, shall be permitted in areas zoned as commercial under this section.

(1) Agricultural, grazing, ranching, horticulture, uses and activities, and the growing of timber, and all other uses and activities reasonably or customarily related thereto, or generally permitted in areas zoned for agriculture, grazing, ranching, or the like (herein collectively referred to as "agricultural activities");

(2) Buildings used for private residences;

(3) Motels and hotels;

(4) Restaurants and similar establishments serving prepared foods on-premise;

(5) Grocery stores;

(6) Gasoline stations;

(7) Sporting goods stores;

(8) Golf clubs and courses;

(9) Agricultural produce stands;

(10) Resorts, and recreational facilities reasonably related to the topography and nature of the land;

(11) Outdoor advertising, whether on-premise or off-premise and regardless of its content; and

(12) Such other uses and activities as the several boards of county commissioners may in their discretion deem suitable therein.

(d) Zoning and building regulations. Outdoor advertising shall be subject to the regulations specified in section 6 concerning size, spacing and lighting and to none other. All other uses and activities specified in subsection (c), except the agricultural activities and private residential uses aforesaid, shall be subject to such reasonable regulations as may be enacted by the several boards of county commissioners, or under their authority, in the manner provided by presently existing or hereafter enacted planning and zoning statutes.

(e) Rezoning by counties. The several boards of county commissioners, or those acting under their authority, in accordance with presently existing or hereafter enacted planning or zoning statutes, are hereby authorized to rezone any commercial zone or part thereof, hereby created, in accordance with applicable zoning principles, in either a more or less restrictive manner; provided, that no restrictive rezoning shall prohibit the agricultural activities and private residential uses, aforesaid. In so acting, such boards, or those acting under their authority, shall utilize their presently existing or hereafter authorized planning and zoning procedures. Nothing in this section shall affect any authority of any political subdivision to zone lands not zoned or rezoned by the legislature hereunder.

(f) Zoning principles. The zoning principles which are relevant to land-use planning and zoning outside of municipalities and which govern in this state are as follows:

(1) Lands, whether vacant or used or not, shall be so zoned as to permit the uses thereof which are appropriate thereto, and to prohibit the uses thereof which are inappropriate thereto.

(2) The present and future needs of the economy of the state for a particular kind of activity and the convenience which it would afford to the citizenry can in themselves render some lands appropriate therefor which might otherwise be inappropriate therefor.

(3) Zoning shall not, contrary to the desires of the affected parties, be unreasonably discriminatory as between the owners of substantially similar parcels of land to similar uses.

(4) Agricultural, horticultural, grazing, and ranching uses and purposes, and the growing of timber, shall always be deemed appropriate upon the lands herein zoned and all other activities specified in subsection (c) shall also be deemed appropriate for the lands herein zoned and lands having a population of low density except where such lands are of uncommon natural beauty, and except as provided in subsection (b).

In zoning as, aforesaid, the legislature has complied with and duly considered its said zoning principles in light of the developing economy, the desirability of lessening commercial congestion within municipalities, the desirable trend towards decentralization of commercial activities, the increasing needs of the motoring public, the economic necessity confronting businesses both inside and outside of municipalities of advertising to the motoring public, and the public interest in protecting areas of uncommon natural beauty.

(g) Effect on taxation. The zoning and rezoning effected and authorized by this section shall not in itself affect any taxes levied against real property or any assessment or assessment classification, but actual increases in value of any parcel of land by reason of the construction or erection of a building or structure thereon shall be taken into account in thereafter assessing the value thereof and in levying any ad valorem tax thereon.

(h) Future existing uses. The commercial zoning affected by this section shall be without prejudice to the right of the legislature hereafter to rezone and further rezone. The legislature further declares its intent to periodically review and, when deemed necessary, to modify or otherwise alter the zoning established by this section based on considerations of economic, physical, social, governmental and other conditions relating to the development of the state. Any sign, display or device used for outdoor advertising, in any such commercial zone, which shall become illegal by reason of zoning by a board of county commissioners under subsection (e), or rezoning by the legislature, as herein provided, shall be required to be removed or brought into compliance as provided in section 8.

Section 5. Unzoned areas. Unzoned commercial and industrial areas are defined for the purposes of this act as follows:

(a) Definition. An "unzoned commercial or industrial area", consistently with and subject to the principles and standards set forth in subsection (f) of section 4, means any of the following unzoned areas adjacent to an interstate or primary highway:

(1) All land on the same side of the highway as, and within 1,000 feet of, any commercial or industrial activity other than outdoor advertising, measured from the boundaries of the land used or occupied by such activity, including its parking, storage and service areas, its driveways, and its established front, rear and side yards constituting an integral part of such activity, except land within 300 feet of a building used primarily as a residence without the consent of the owner thereof;

(2) All land on the other side of the highway which is directly opposite from, and of the same dimensions as, any area defined under the preceding paragraph, to the extent that such land is appropriate for outdoor advertising;

(3) All land within 200 feet of the nearest edge of the right-of-way of the highway, measured perpendicularly to such edge, to the extent that such land is traversed by a railroad right-of-way and is appropriate for outdoor advertising;

(4) All pockets of land lying between any commercial or industrial areas (whether so zoned or whether unzoned as defined in this subsection) which are not more than 1,000 feet apart, to the extent that such land is appropriate for outdoor advertising; and

(5) In addition, pursuant to the exercise of an informed discretion, all other unzoned lands appropriate for outdoor advertising which are determined to be unzoned commercial or industrial areas by any board of county commissioners.

(b) Determinations and redeterminations. The several boards of county commissioners shall determine the additional unzoned commercial or industrial areas provided for by paragraph (5) of subsection (a), and shall also redetermine unzoned commercial and industrial areas defined under paragraphs (2), (3), and (4) thereof to be non-commercial and non-industrial unzoned areas to the extent that same are not appropriate for outdoor advertising. In so acting such boards shall utilize the procedures authorized in subsection (e) of section 4, and shall apply the zoning principles set forth in subsection (f) of section 4.

Section 6. Regulations; customary usages. Subject to the provisions for the removal of nonconforming signs and the payment of just compensation therefor, contained in sections 8 and 9 herein, and after January 1, 1968, signs subject to this act, but permitted under subsections (d) and (e) of section 3, shall comply with the regulations of this section governing the size, lighting and spacing thereof, which regulations are consistent with customary usages of this state.

(a) Regulations as to size.

(1) The maximum area of a sign face shall be 650 square feet, including border and trim, but not supports.

(2) In the case of double-faced, back-to-back and V-type signs, said size limitation shall be 650 square feet, applicable to each separate face.

(b) Regulations as to lighting.

(1) No revolving or rotating beam of light simulating an official emergency device shall be permitted. Signs with flashing red, green or amber incandescent lights shall not be permitted, except in illuminated signs giving such public service information as time, date, temperature or direction.

(2) External lighting, such as floodlights, slimline and gooseneck reflectors, shall be permitted, provided that it is shielded so as to prevent the direction of rays of light to any part of the main-traveled way.

(3) No lighting shall interfere with the effectiveness of any official traffic control device or official warning sign.

(c) Regulations as to spacing.

(1) Within municipalities, signs shall be erected and maintained in conformity with any applicable building codes and ordinances relating to spacing.

(2) Outside of municipalities, no sign shall be erected adjacent to a limited access highway within 500 feet, nor adjacent to a non-limited access

highway within 500 feet, of an existing off-premise sign unless separated therefrom by a building, structure, highway or roadway.

(3) Neither inside nor outside of municipalities shall any sign be erected or maintained in such a location as to prevent the driver of a vehicle from having an effective view of any official traffic control device applicable to him or of approaching, merging or intersecting traffic within 500 feet of such sign.

(4) For the purposes of the spacing regulations aforesaid, double-faced, back-to-back, and V-type signs shall be considered as a single sign.

(d) Legislative finding. The legislature has conducted hearings and received evidence as to customary usage in outdoor advertising in this state, and, based thereon, and upon its own knowledge thereof, does hereby find and determine that the regulations in this paragraph set forth as to size, lighting and spacing are consistent with customary usage in this state.

Section 7. Permits. After January 1, 1968, no private off-premise sign shall be maintained without a permit. Applications for permit shall be made to the state highway commission or, within municipalities, to the municipal authority designated by its legislative body, on forms furnished by said commission, and calling for reasonable information, including a statement that the owner or occupant of the land in question has consented to the erection or maintenance of the sign thereon, and shall be accompanied by a fee in accordance with the following schedule:

- (a) \$0.50 if the advertising area does not exceed 50 square feet;
- (b) \$1.00 if such area exceeds 50 but does not exceed 300 square feet;
- (c) \$2.00 if such area exceeds 300 square feet.

Permits shall be for the calendar year, shall be assigned a permanent number, and shall be renewed annually upon payment of said fee for the new year without the filing of a new application. Fees shall not be prorated for fractions of the year. Two permits shall be required for a double-faced, back-to-back, or V-type sign. Advertising copy may be changed at any time without the payment of an additional fee.

The commission or municipal authority shall issue a permit for the sign covered by application duly made as aforesaid unless it is in violation of this act and, upon the initial issuance of a permit, shall also issue a permanent identification tag, not larger than six square inches, carrying the permit number, which tag the permittee shall affix to the sign. Notwithstanding the foregoing, and despite any such violation, a permit and identification tag shall be issued for any sign in existence on the effective date of this act and the permit shall thereafter be renewed for the periods of time prescribed in section 8.

A permit may be revoked after hearing upon thirty (30) days notice if the state highway commission finds that any statement made in the application therefor was false or misleading or that the sign covered thereby is not in good general condition and in a reasonable state of repair, or is otherwise in violation of this act, provided that such false or misleading information has not been corrected and that the sign has not been brought into compliance with this act within thirty (30) days after written notification thereof.

Section 8. Removal of nonconforming signs. Any sign lawfully in existence along the interstate system or the primary system on October 22, 1965, and which is not then in conformity with the provisions contained herein shall not be required to be removed until July 1, 1970. Any other sign lawfully erected which does not on January 1, 1968, or at any time thereafter, conform to this act, shall not be required to be removed until the end of the fifth year after it becomes nonconforming.

Section 9. Compensation for removal of signs. The state highway commission is directed to acquire by purchase, gift or condemnation and shall pay just compensation when and insofar as signs are required to be removed by this act, as follows:

(a) Any such removal, by whomever effected, shall be deemed a taking and appropriation by this state of the following:

(1) From the owner of such sign: all right, title, and interest in such sign, and in his leasehold, license or other interest, including purely contractual interests, in or related to the land; and

(2) From the owner of the real property on which the sign is located: the right to erect and maintain the sign thereon, whether or not a contractual arrangement for the erection and maintenance of such sign exists.

(b) In cases of purchase, compensation shall be paid in the amount and at the time mutually agreed upon. In cases of condemnation, compensation shall be paid in the amount computed as aforesaid, and the person or persons entitled thereto shall have the same rights in respect to the time of payment, procedures, and resort to the courts of this state as those of a record owner whose fee in lands has been condemned and taken for highway right-of-way.

(c) In addition, the state highway commission may voluntarily purchase from any sign owner or landowner the rights, titles, interests and elements of value aforesaid prior to the time when the sign's removal is required by this act, or whether or not its removal is required by this act, upon such terms as to price, removal, date of removal, and otherwise, as are mutually agreeable to it and to the owners of the sign and land.

Section 10. Unlawful advertising. Any advertising sign which violates the provisions of this act is hereby declared to be illegal. Subject to sections 8 and 9, the state highway commission shall give thirty (30) days notice, by certified mail, to the owner thereof to remove same if it is a prohibited sign or cause it to conform to regulations if it is an authorized sign. If the owner fails to act within thirty (30) days as required in the notice, the state highway commission shall proceed to cause the removal of the sign under section 11 at the owner's expense.

Section 11. Enforcement. The state highway commission shall enforce the provisions of this act through the remedy of injunction or other appropriate legal proceedings, and shall not act except through such proceedings. Neither the state highway commission nor any other agency nor political subdivision of this state shall by plantings or otherwise obstruct the view, or in any other way interfere with the effectiveness, of any sign legally in place under the provisions of this act.

Section 12. Agreements with the United States. The state highway commission is hereby authorized and directed in behalf of this state to seek agreements with the secretary of commerce or the secretary of transportation as to the matters specified for agreement in subsection (d) of section 131 of Title 23, United States Code. Said commission's authority so to act is hereby limited, consistently with constitutional principles, to seeking and if possible making agreements embodying the provisions and only the provisions of sections 5 and 6, on the basis that they are in conformity with said Section 131.

If such agreement or agreements cannot be achieved, the attorney general of this state shall promptly initiate proceedings under the provisions of said Section 131 with respect to hearings, stay-of-penalties, and judicial review in order to resolve the disagreement by judicial determination. He shall also initiate such proceedings in the event of a determination to withhold any funds from this state for any alleged failure of this state to comply with any provision of said Section 131, in order to obtain a judicial determination of whether this act provides effective control of outdoor advertising in conformity with said Section 131.

Section 13. Guarantee against loss of funds. It is the overriding intent of this Act, while asserting the rightful independence of this State in regard to the regulation of land usage within its borders, to ensure in all events against the withholding of any Federal-aid highway funds from this State under the Federal Highway Beautification Act of 1965. Accordingly, in the event that a United States District Court for this State or, in case of further appeal or review, the United States Court of Appeals or Supreme Court should hold any part of this Act, or any action taken hereunder, to be in noncompliance with said Federal Act, the State Highway Commission shall, when all possibilities of review have been exhausted, promulgate such regulations as are minimally necessary to avoid the loss, of any such funds, which regulations shall govern to the extent of any inconsistency between them and this Act and shall be retroactively effective from January 1, 1968, if necessary to achieve the objective of this section, and until modified or superseded by further action by the Legislature. Such regulations may suspend or supersede any provision of this Act or any action taken hereunder, including any zoning action, but only to the extent necessary to achieve the objective of this section. In so acting the State Highway Commission shall be guided by and conform to the judgment and instructions of the highest court to rule on this Act's compliance or not, and, in the case of the two matters specified for agreement with the Secretary of Commerce or Transportation in subsection (d) of Section 131 of said Title 23, by the position of such Secretary to the extent that it may not have been set aside, modified or disapproved by such court.

Section 14. Congressional action or non-action. In the event that the congress should fail prior to January 1, 1970, to make an appropriation for compensation purposes in such an amount that this state's share thereof will be sufficient to pay seventy-five per cent (75%) of the compensation provided for in section 9, to the extent payable under the highway beautification act of 1965, and as estimated by the state highway commission, this act shall on January 1, 1970, become automatically null and void. In any event, if at any time in the future congress should amend Section 131 of Title 23, United States Code, or whatever law might then provide for federally required control of signs by the several states, in such manner as to no longer require control of signs in areas adjacent to the primary system, or any part or parts thereof, this act shall automatically be deemed amended as of the effective date of such congressional action in such manner that it will thenceforth in no way whatsoever control, restrict, regulate, or in any way affect the erection or maintenance of signs in areas adjacent to the primary system, or to such part or parts thereof; provided, however, that nothing herein shall diminish the rights of any sign owner to compensation under section 9 for signs which may theretofore have been removed from areas adjacent to the primary system.

Section 15. Repeals. All statutes and regulations promulgated thereunder governing outdoor advertising adjacent to the federal interstate and primary highway systems are hereby repealed.

Section 16. Severability clause. It is the intent of the legislative assembly that if a part of this act is invalid, all valid parts that are severable from the invalid part remain in effect. If a part of the act is invalid in one or more of its applications, the part remains in effect in all valid applications that are severable from the invalid applications.

And as amended, do pass.

February 15, 1967

Mr. Speaker: We, your Committee on Research and Resources, having had under consideration House Resolution No. 1, respectfully report as follows: That House Resolution No. 1 be amended as follows:

A RESOLUTION OF THE HOUSE OF REPRESENTATIVES PROVIDING FOR THE APPOINTMENT OF A LEGISLATIVE FISCAL REVIEW COMMITTEE:

WHEREAS, the Montana legislative assembly is vested with constitutional authority to provide moneys for the operation of state government, and

WHEREAS, because of the limited time in which to review the budget, and due to the lack of staff assistance, the legislative assembly is unable to adequately fulfill this constitutional responsibility, and

WHEREAS, as a means of validating the legislature's control over state finances, many states have established programs to review and analyze state fiscal problems between legislative sessions.

NOW, THEREFORE, BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES OF THE STATE OF MONTANA:

That the speaker consider the appointment of four members of the house of representatives, no more than two of whom shall be of the same political party, to join with a like number from the senate to form a fiscal review committee.

Mr. Speaker: We, your Committee on Research and Resources, having had under consideration House Resolution No. 4, respectfully report as follows: That House Resolution No. 4 be adopted.

#### HOUSE RESOLUTION NO. 4

Introduced by Harrison, Delano, Patrick, Murphy, McGrath, Sullivan, Harlow.

#### A RESOLUTION OF THE HOUSE OF REPRESENTATIVES OF THE STATE OF MONTANA TO PROVIDE FEDERAL ASSISTANCE TO DOMESTIC GOLD PRODUCERS.

WHEREAS, since 1934, domestic gold producers have been required to sell their product only to the Federal Government at the established price of \$35 per ounce, and

WHEREAS, costs of producing this precious metal have continued to increase at an alarming rate reflecting the impact of inflation upon the economics of gold mining and milling operations with the result that virtually all gold producers in the United States have closed down their properties, and

WHEREAS, domestic gold production, which amounted to approximately 5,000,000 ounces in 1940, has now dropped to an annual rate slightly in excess of 1,500,000 ounces while current domestic gold consumption for defense and space needs, industrial requirements, the arts and crafts, and dental use has rapidly risen to a significant rate of approximately 6,000,000 ounces per annum, over three times our U. S. production rate, and

WHEREAS, the continuing outflow of gold and failure to solve our balance of payments deficit continues to be of ever greater national concern, and

WHEREAS, the disparity between domestic consumption and production imposes an additional substantial drain upon the monetary gold reserves of the United States, and

WHEREAS, federal relief legislation revitalizing the U. S. gold mining industry could well end continuing substantial depletion of our monetary

gold reserves to supply U. S. internal domestic gold consumption which should alleviate to some extent concern in foreign circles over our monetary policies, and

WHEREAS, such legislation to stimulate domestic gold production is definitely in the national interest.

NOW, THEREFORE, BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES OF THE STATE OF MONTANA:

That members of the House of Representatives of the State of Montana respectfully request the Congress of the United States to investigate means of providing incentives to domestic gold producers to stabilize the few existing U. S. gold properties, to reopen dormant gold mines, and to encourage aggressive exploration for new gold ore reserves in this country.

BE IT FURTHER RESOLVED, that a duly attested copy of this resolution be immediately transmitted to the Secretary of the Senate of the United States, the Clerk of the House of Representatives of the United States and to each member of the Congress from the State of Montana.

### GOVERNOR BABCOCK'S MESSAGE TO JOINT SESSION

February 27, 1967

On an afternoon fifty-six days ago, at almost this same hour, I appealed to you to set upon the monumental and important problems of government, in a spirit of partnership removed as far as possible from the influences of party and political differences.

To assist in this hope, I have made every effort to avoid imposing my thoughts or beliefs into your deliberations. I have chosen to make no public utterances or personal appeals that could be interpreted as an attempt to project my office unreasonably into the function of the legislature.

It is with some regret then that I feel compelled to seek your indulgence today in a joint session. The turn of events appear to be so grave, so much that is needed appears in danger of not being done, that I feel it incumbent for me in the position I occupy to make a most earnest appeal.

The program submitted to this legislature for consideration was designed to project Montana into its appropriate place in the Sisterhood of

States. I think there has been little dissension regarding the worth of the program. Members of both parties, while finding fault with minor details, are in agreement on the need and the wisdom of a bold progressive plan of action for our people.

While there is substantial agreement on the program itself, there are strong differences on the method or methods of financing it.

Regrettably, there appears to be such strong differences that at this time the two bodies of the legislature have reached an impasse concerning revenues. It is with the deepest concern that I view the alternative. If some measure is not developed to furnish adequate revenues for the services that are needed, then the appropriations must be geared to the amount of money that is available under existing revenue accounts.

This would deny the development we must have in our educational programs. This would deny the state participating adequately in our welfare and medical aid program. This would, in effect, heap still further property tax responsibility on the shoulders of those already overburdened. This would refuse to give consideration to a much-needed water development program. All of the services of state government would go undernourished and restricted. There can only be one consequence. We would, as a state and a people, recede rapidly into the economic backwash from which recovery would at best be a long, slow and expensive project.

The need for a sound and sensible revenue program is so great . . . the impasse created by conflict between the two houses so severe . . . and the time remaining so short . . . that I consider it essential to offer a suggestion that might bring us to a reasonable and mutually agreeable solution to our great problems.

From the first, our proposal has included, as a basic element, submitting to the voters the question of whether the sales tax should be included in our basic tax structure. Some of you have insisted that an increase in the income tax can meet our needs more equitably than a sales tax.

Since the two houses have been unable to agree, I now propose that the legislature present to the people, at a special election in June of this year, a clear and fair choice between the sales tax and an increase in the personal and corporate income taxes to provide the needed additional revenues for the coming biennium. I must emphasize that the need is now . . . not two years from now.

The sales tax measure, which was defeated last Saturday . . . after refunding \$14½ million in income taxes, would have provided \$56 million in revenue for needed state services and property tax relief.

This would have included full participation by the state to meet its obligation to public schools. The money would have granted at least \$40 million in relief to the Montana property taxpayer, whose burden is now the highest in the nation.

The additional \$16 million would have been used in the areas of our greatest need . . . the custodial institutions, the university system, public safety, vocational education, medicaid and water development.

I make these points especially because the alternative to the sales tax which should be offered to the voters clearly should be an increase in income taxes which also will provide the \$56 million needed. Unfortunately, that means that the income tax would have to be doubled, approximately, to accomplish what must be done.

I would welcome sincere efforts by both parties in both houses to work out the details of a June referendum to let the people choose between these two solutions to our problem.

Once more, let me make clear that I am not suggesting a choice between a sales tax which will really meet our needs and a relatively lower income tax increase, which would not provide adequate financing. A 10 to 12 percent increase in income taxes, which some legislators have suggested, could not possibly be a satisfactory alternative. Such a stop gap proposal would fail to meet the state's obligation to the foundation program. Not only would no property tax relief be provided, but higher property taxes inevitably would result.

Mention should be made that because of recent developments, equally unfortunate consequences appear eminent in our highway construction program. Two nights ago a telephone call from the White House assured me that a very substantial part . . . if not all . . . of the federal cut in highway funds will be restored.

This places more emphasis on the need to provide revenues to finance our portion of the highway program.

It is hoped that you will re-examine the defeat of the highway revenue measures designed to provide nearly \$3 million in state funds. Failure to enact these could mean a reduction of approximately \$50 million in our highway construction program.

The damage is obvious.

Let me add, also, that because of reports, both published and unpublished, that action in the courts will be brought to enjoin the legislature from continuing its business after the 60th day of the regular session, I strongly suggest that your business be completed before midnight Thursday.

I make all of these appeals to you in good faith and in the earnest hope that we put aside partisanship in the few days that are left to us. In the four days that follow, the measure of courage of each of us will have to be determined.

But this is not a personal matter. More important is the fact that the destiny of this beloved state and all of its people will be determined during these next few days . . . not just for this biennium but perhaps for decades ahead.

I appeal to you to place the State of Montana and its people ahead of other considerations. If I may paraphrase . . . "I would ask that you not love your party less, but that you love your state more."

#### IN MEMORIAM 1967

#### AFTERWARD

One cannot stand forever at a new made grave,  
The last dry sob must somehow be kept down—  
There's nothing left to do but turn about  
And start the long slow journey back to town,  
"We die a little, too," someone has said.  
"When death comes to an old and well loved friend".  
Beneath the cypress we leave something, too,  
Out of ourselves—that's missing to the end.  
Somehow the long days pass on into Time.  
The Loom of Life goes steadily on and on,  
Weaving a pattern that holds beauty still,  
E'en tho' one lovely colored strand is gone.

—Eleanor Dougherty

#### HOUSE RESOLUTION NO. 19

INTRODUCED BY E. B. SMITH, WHITNEY, PERRY, KVAALEN, EGAN, STAIGMILLER, GUNDERSON, FASBENDER, SWAN, BARDANOUVE, WALLANDER, BRAND, CASEY, HARLOW, HALL, PREVOST, TWEDT, SLABY, HOLTZ, MEHRENS, ASPEVIG, BOLLINGER, BAILEY.

A RESOLUTION OF THE HOUSE OF REPRESENTATIVES OF THE STATE OF MONTANA REQUESTING THE CONGRESS OF THE UNITED STATES TO INVESTIGATE AND STUDY GRAIN RATES AND THE GRAIN RATE STRUCTURE, GENERALLY, IN THE WESTERN DISTRICT OF THE UNITED STATES.

WHEREAS, Montana's economy is dependent to a large extent upon the production and sale of agricultural products, particularly wheat and other small grains; and

WHEREAS, the bulk of all small grains produced in Montana enter Interstate Commerce via the state's network of railroad systems in order to reach markets for sale, processing, or consumption, and compete with similar grains of other states, and of foreign countries; and

WHEREAS, the freight rates and charges prevailing for the transportation of these grains via said railway system have a definite influence upon the ability of Montana's grains to reach markets and places at which these grains are processed and utilized or consumed, and to successfully compete with the grains of other states and foreign countries; and

WHEREAS, the most recent general investigation by the Interstate Commerce Commission of the freight rates on grains in the West, which included Montana, was completed in 1934 pursuant to the Hoch-Smith Resolution (Public Resolution No. 46, 68th Congress, 43 Stat. L., 801) with piecemeal revisions permitted or imposed at various times since 1934; and

WHEREAS, during the intervening years since 1934 there have developed substantial changes in market patterns; competitive conditions as between transportation agencies; improvements in transportation facilities and marketing of products of small grains; the manufacture of new and different products; and shifts in population; and

WHEREAS, the present freight rates structure does not reflect the present day needs of the producer particularly, but also other interests marketing and processing small grains in the light of these changed circumstances and conditions, and this has resulted in numerous unreasonable and unduly prejudicial and preferential rates, and that where piecemeal revisions have been made, they have in many instances aggravated existing conditions; and

WHEREAS, although they have been requested on numerous occasions to do so, the railroads serving Montana are unwilling, of their own accord, to make the necessary adjustments in domestic and export grain rates affecting Montana's ability to compete favorably with grains and grain products produced in other states, to the detriment of Montana's economy.

NOW, THEREFORE, BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES OF THE STATE OF MONTANA:

That the Congress of the United States be requested to direct a subcommittee from either the United States Senate Committee on Commerce

or from the House of Representatives Committee on Interstate and Foreign Commerce to conduct a study of the distribution of grain and grain products in domestic and export commerce to determine if an investigation is not warranted.

BE IT FURTHER RESOLVED, that the Chief Clerk of the House of Representatives send copies of this Resolution to the Committee on Commerce of the Senate of the United States, the Committee on Interstate and Foreign Commerce of the House of Representatives of the United States, to the Department of Transportation, and to each member of the Montana congressional delegation.

## HOUSE RESOLUTION NO. 29

INTRODUCED BY GOAN, FELT, ULMER, LUCAS

A RESOLUTION OF THE HOUSE OF REPRESENTATIVES DIRECTING THE STATE BOARD OF EQUALIZATION TO REVISE FORMS USED FOR REPORTING CORPORATION LICENSE TAXES TO REQUIRE REPORTS FROM ALL CORPORATIONS ON THE GROSS VOLUME OF BUSINESS DONE IN MONTANA AND OTHER INFORMATION PERTINENT TO THE TAXATION OF CORPORATIONS UNDER MONTANA CORPORATION LICENSE TAX STATUTES.

WHEREAS, during the consideration of revenue measures during the 1967 legislative session, considerable controversy centered on the adequacy of present statutes taxing corporations; and

WHEREAS, information compiled by legislators studying the taxation of corporations indicates that many corporations doing a substantial volume of business in Montana pay only the minimum, or very little, corporation license tax; and

WHEREAS, it appears that changes in corporation license tax statutes could result in additional needed revenue for the state of Montana and also achieve much more equity in taxation than presently exists; and

WHEREAS, a necessary first step in improving the taxation of corporations is the compilation of data from which reasoned conclusions can be drawn.

NOW, THEREFORE, BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES OF THE STATE OF MONTANA:

That the State Board of Equalization is directed to revise the forms presently used for reporting corporation license taxes due by adding a requirement that all corporations, both foreign and domestic, report the gross volume of business done in Montana.

BE IT FURTHER RESOLVED, that the State Board of Equalization is directed to take other steps to improve the administration of corporation license tax statutes and insure that the state is receiving the revenue to which it is entitled and also improve the equity of taxation in Montana including the collection of pertinent information on the taxation of corporations.

BE IT FURTHER RESOLVED, that the State Board of Equalization is directed to report the action taken as directed by this resolution to the Legislative Council as information becomes available and to the Forty-first Legislative Assembly together with recommendations for any additional suggested improvements which require legislation.

BE IT FURTHER RESOLVED, that the Chief Clerk of the House of Representatives is directed to send copies of this resolution to each member of the State Board of Equalization.

#### A RESEARCH AND RESOURCES COMMITTEE REPORT TO THE SECRETARY OF STATE:

Assuming that the voters ratify the constitutional amendment for an eighty (80) day legislative session and as a result of a survey made in the 40th Legislative Assembly, the Research and Resources Committee makes the following report.

Taking into account the survey, it is the feeling of the committee that the efficiency of the legislative assembly could be improved if the following recommendations were adopted.

1. To have no more than twenty (20) days for introduction of bills.
2. To have thirty (30) days between introduction of bills and transmittal.
3. To have a half day during the week or a whole day during the week to be used for committee meetings.
4. Form a screening committee which would screen all proposed bills for duplication and proper form.
5. Each committee chairman send a written notification to all the chief sponsors of bills at least twenty-four (24) hours prior to the time their bills are to be heard in the meeting.
6. Posting of committee meetings shall include, as well as the day of the committee meetings, the approximate time that each bill will be heard.
7. At the beginning of the session, have all department heads introduce themselves to the assembly and explain how they will be working with the assembly instead of having university people speak to the group.

### MESSAGES FROM THE GOVERNOR

March 4, 1967

Honorable James R. Felt  
Speaker of the House of Representatives  
Capitol Building  
Helena, Montana

Dear Sir:

Article VII, Section 10, of the Montana Constitution requires that I deliver to you a message at the beginning of each session. In the interest of time, I would not ask that I be allowed to personally address you in joint session, but instead use this means to deliver this brief message.

Only the most dire circumstances could force me to call this assembly into extraordinary session. Without going over the events of the past day, let it be sufficient to point out that the 40th Legislative Assembly has been prohibited from completing its work in the traditional overtime period.

The business which this extraordinary session has before it is to appropriate money for the support of government, it being essential, of course, that state government be continued through the next biennium.

Inasmuch as I have twice addressed you in the past 62 days, it would serve no useful purpose to do so again at length. I would only

## COMMUNICATIONS AND PETITIONS

March 14, 1967

Mr. James R. Felt  
Speaker of the House  
State Capitol  
Helena, Montana

Dear Mr. Felt:

Early in the 40th session of the Legislative Assembly, we provided to each legislator a copy of "Implications for Education of Prospective Changes in Society by 1980." This publication, a report of an Eight-State Project regional conference in Salt Lake City, is in wide demand throughout Montana. Because our supply of copies is limited, I wonder if it might be possible to have an announcement made from the floor, requesting that legislators who do not wish to keep their copies please return them to the Sergeant-at-Arms. This will enable a redistribution of those copies to meet statewide requests.

I will be most appreciative of your consideration and assistance in in this matter. Thank you.

Sincerely,

HARRIET MILLER,  
State Superintendent
